

exemption with respect to a person operating under the exemption.

VII. Conclusion

Based upon its evaluation of the 25 exemption applications, FMCSA exempts the following drivers from the vision requirement, 49 CFR 391.41(b)(10), subject to the requirements cited above:

Paul A. Bartels (WI)
Harold J. Bartley, Jr. (KY)
Charles C. Berns (IA)
Eric L. Boyle, Jr. (MD)
Jeremiah E. Casey (MO)
Leonard M. Cassieri (CA)
Randy J. Conrad (IA)
Jimmie E. Curtis (NM)
Daniel E. Delano (VA)
Jonathan P. Edwards (PA)
James A. Green (IL)
Richard Healy (MD)
Tommy G. Hillis (TX)
Richard A. Honstad (MN)
Stephen M. Lovell (TX)
Thomas P. Maio (ME)
Carlos Marquez (WI)
Jason L. McBride (MI)
Dennis M. Olson (WI)
Kameron W. Quinalty (AR)
Daniel C. Sagert (WI)
Robert D. Steele (WA)
Richard C. Strassburg (NY)
Jeremy E. Studebaker (IN)
Daniel D. Woodworth (LA)

In accordance with 49 U.S.C. 31136(e) and 31315, each exemption will be valid for two years from the effective date unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained prior to being granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136 and 31315.

[Docket No. FMCSA-2017-0116]

Qualification of Drivers; Exemption Applications; Implantable Cardioverter Defibrillator (ICD)

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of denials.

SUMMARY: FMCSA announces its decision to deny applications from two individuals treated with Implantable Cardioverter Defibrillators (ICDs) who requested an exemption from the Federal Motor Carrier Safety Regulations (FMCSRs) prohibiting operation of a commercial motor vehicle (CMV) in interstate commerce by persons with a current clinical diagnosis of myocardial infarction, angina pectoris, coronary insufficiency, thrombosis, or any other cardiovascular disease of a variety known to be accompanied by syncope, dyspnea, collapse, or congestive heart failure.

II. Background

On May 4, 2017, FMCSA published a FR notice (82 FR 20961) announcing receipt of applications from two individuals treated with ICDs and requested comments from the public. These two individuals requested an exemption from 49 CFR 391.41(b)(4) which prohibits operation of a CMV in interstate commerce by persons with a

current clinical diagnosis of myocardial infarction, angina pectoris, coronary insufficiency, thrombosis, or any other cardiovascular disease of a variety known to be accompanied by syncope, dyspnea, collapse, or congestive heart failure. The public comment period closed on June 5, 2017, and two comments were received.

FMCSA has evaluated the eligibility of these applicants and concluded that granting these exemptions would not provide a level of safety that would be equivalent to or greater than, the level of safety that would be obtained by complying with the regulation 49 CFR 391.41(b)(4). A summary of each applicant's medical history related to their ICD exemption request was discussed in the May 4, 2017, **Federal Register** notice and will not be repeated in this notice.

In reaching the decision to deny these exemption requests, the Agency considered information from the Cardiovascular Medical Advisory Criteria, the April 2007 Evidence Report "Cardiovascular Disease and Commercial Motor Vehicle Driver Safety, a December 2014 focused research report "Implantable Cardioverter Defibrillators and the Impact of a Shock in a Patient When Deployed." Copies of the reports are included in the docket.

FMCSA has published advisory criteria to assist medical examiners in determining whether drivers with certain medical conditions are qualified to operate a CMV in interstate commerce. [Appendix A to Part 391—Medical Advisory Criteria, section D, paragraph 4.] The advisory criteria for 49 CFR 391.41(b)(4) indicates that coronary artery bypass surgery and pacemaker implantation are remedial procedures and thus, not medically disqualifying. Implantable cardioverter defibrillators are disqualifying due to risk of syncope.

III. Discussion of Comments

FMCSA received two comments in this proceeding. Each of the comments was favorable towards the applicants continuing to drive CMV's with ICD's citing their ICDs have not deployed and their medical and physical conditions are stable. FMCSA acknowledges the commenters' responses concerning stable medical histories with ICDs. Based on the available medical literature cited above, however, FMCSA believes that a driver with an ICD is at risk for incapacitation if the device discharges. This risk is combined with the risks associated with the underlying cardiovascular condition for which the

ICD has been implanted as a primary or secondary preventive measure.

IV. Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption if it finds such an exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such an exemption.

The Agency's decision regarding these exemption applications is based on an individualized assessment of each applicant's medical information provided by the applicant, available medical and scientific data concerning ICDs, and public comments received.

In the case of persons with ICDs, the underlying condition for which the ICD was implanted places the individual at high risk for syncope (a transient loss of consciousness) or other unpredictable events known to result in gradual or sudden incapacitation. ICDs may discharge, which could result in loss of ability to safely control a CMV. See the April 2007 Evidence Report on Cardiovascular Disease and Commercial Motor vehicle Driver Safety, April 2007.¹ A focused research report on Implantable Cardioverter Defibrillators and the Impact of a Shock on a Patient When Deployed completed for the FMCSA December 2014 indicates that the available scientific data on persons with ICDs and CMV driving does not support that persons with ICDs who operate CMVs are able to meet an equal or greater level of safety and upholds the findings of the April 2007 report.

V. Conclusion

The Agency has determined that the available medical and scientific literature and research provides insufficient data to enable the Agency to conclude that granting these exemptions would achieve a level of safety equivalent to, or greater than, the level of safety maintained without the exemption. Therefore, the following two applicants have been denied exemptions from the physical qualification standards in 49 CFR 391.41(b)(4):

Justin D. Dale (IA)

Raymond M. Loffredo (PA)

Each applicant has, prior to this notice, received a letter of final disposition regarding his/her exemption request. Those decision letters fully outlined the basis for the denial and constitutes final action by the Agency. The list published today summarizes

the Agency's recent denials as required under 49 U.S.C. 31315(b)(4).

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the FMCSRs for a five-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption." The statute also allows the Agency to renew exemptions at the end of the five-year period. FMCSA grants exemptions from the FMCSRs for a two-year period to align with the maximum duration of a driver's medical certification.

The 14 individuals listed in this notice have requested an exemption from the vision requirement in 49 CFR 391.41(b)(10). Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting an exemption will achieve the required level of safety mandated by statute.

The physical qualification standard for drivers regarding vision found in 49 CFR 391.41(b)(10) states that a person is physically qualified to drive a CMV if
