Proposed Project

An Evaluation Survey on the Use and Effectiveness of Internet SAMMEC, (0920-0624)—Extension—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Since 1987, CDC has used the Smoking-Attributable Mortality, Morbidity, and Economic Costs (SAMMEC) software to estimate the disease impact of smoking for the nation, states, and large populations. The Internet version of the SAMMEC software was released in 2002, and it contains two distinct computational programs, Adult SAMMEC and Maternal and Child Health SAMMEC, which can be used to estimate the adverse health outcomes and disease impact of smoking on adults and infants.

Since the release of Internet SAMMEC, more than 1230 tobacco

control professionals in the State health departments and other tobacco control institutions in the country have used SAMMEC to generate the data they need for their projects. Some of them have provided comments and sent requests for assistance. Of those users, 1000 will be recruited to participate in this survey.

The purpose of this survey is to evaluate the use and effectiveness of the SAMMEC software and identify ways to improve the system so that it will better meet the needs of the users in tobacco control and prevention. There are no costs to the respondents except for their time in completing the questionnaire.

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hrs.)
Tobacco Control Professionals/Internet SAMMEC Users	1000	1	15/60	250
Total				250
