

areas, protection and enhancement of Indiana bat habitat outside the project area, various curtailment regimes for turbines during prime activity or migration periods, and post-construction monitoring for fatalities.

Environmental Review

The Service will conduct an environmental review to analyze various alternatives for implementing the proposed action and the associated impacts of each. The draft EIS will be the basis for the impact evaluation for Indiana bats and the range of alternatives to be addressed. The draft EIS is expected to provide biological descriptions of the affected species and habitats, as well as the effects of the alternatives on other resources such as vegetation, wetlands, wildlife, geology and soils, air quality, water resources, water quality, cultural resources, land use, recreation, water use, local economy, and environmental justice. Following completion of the environmental review, the Service will publish a notice of availability and a request for comments on the draft EIS and the applicant's permit application, which will include the draft HCP. The draft EIS and draft HCP are expected to be completed and available to the public in mid-2010.

Authority

This notice is being furnished as provided for by the NEPA Regulations (40 CFR 1501.7 and 1508.22). The intent of the notice is to obtain suggestions and additional information from other agencies and the public on the scope of issues to be considered.
