## SUPPLEMENTARY INFORMATION:

### I. Background

As part of its license renewal, the licensee has requested an exemption from the requirement in 10 CFR 30.32(g) to list sealed sources by their manufacturer and model number as registered under the provisions of section 10 CFR 32.210 of Title 10, Code of Federal Regulations (10 CFR). The licensee requested this exemption in a letter dated October 19, 2011. The NRC has prepared an Environmental Assessment (EA) in support of this proposed action in accordance with the requirements in 10 CFR part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate with respect to the proposed action. The license renewal and amendment, addressing the approval of the exemption request, will be issued to the licensee following the publication of this FONSI and EA in the **Federal Register**.

### II. Environmental Assessment

#### Identification of Proposed Action

The proposed action would renew License No. 45-25134-01 and grant a license amendment, approving of the licensee's request for exemption dated, October 19, 2011. License No. 45-25134-01 was issued on February 25, 1991, pursuant to 10 CFR Parts 30, 40, and 70, and has been amended periodically since that time. This license authorizes the licensee to receive, store, use and transfer specified radioactive materials incident to research and development as defined in 10 CFR 30.4. On June 20, 2011, the licensee submitted its renewal application for License No. 45-25134-01. In a letter dated October 19, 2011, submitted in response to an inquiry from the NRC, the licensee requested an exemption from the requirement in 10 CFR 30.32(g) to list sealed sources by their manufacturer and model number as registered under the provisions of 10 CFR 32.210. In requesting this exemption, the licensee states that the purpose of possessing the sealed sources is to “remove and store devices of foreign manufacture for further testing and evaluation.” The licensee receives material in the form of painted disks, sealed tubes, sealed calibration sources, plated foils, and other previously manufactured military and civilian
