

Newcastle disease is a contagious disease of birds and poultry caused by a paramyxovirus. Newcastle disease, as defined in § 94.0, is one of most infectious diseases of poultry in the world. A death rate of almost 100 percent can occur in unvaccinated poultry flocks. Newcastle disease can also infect and cause death even in vaccinated birds and poultry.

APHIS' regulations prohibit or restrict the importation of unprocessed bird and poultry products and byproducts from regions that have reported the presence of HPAI or Newcastle disease, and contain permit and quarantine requirements for U.S. origin pet birds and performing or theatrical birds and poultry returning to the United States. In addition, there are also restrictions concerning importation of live poultry and birds that have been vaccinated for certain types of avian influenza, or that have moved through or originate from regions where HPAI or Newcastle disease is considered to exist. These regulations require the use of a number of information collection activities, including the completion of a USDA-APHIS Veterinary Services (VS) Application For Permit To Import or Transport Controlled Materials or Organisms or Vectors (VS Form 16-3); a United States Veterinary Permit for Importation and Transportation of Controlled Materials and Organisms and Vectors (VS Form 16-6A); an Application for Approval or Report of Inspection Establishment Handling Restricted Animal Byproducts or Controlled Materials (VS Form 16-25); USDA-APHIS VS Agreement for Handling Restricted Imports of Animal By-Products and Controlled Materials (VS Form 16-26); USDA-APHIS VS Report of Entry, Shipment of Restricted Imported Animal Products and Animal By-Products, and Other Material (VS Form 16-78); USDA-APHIS VS Application for Import or in Transit Permit (Animals, Animal Semen, Animal Embryos, Birds, Poultry, and Hatching Eggs) (VS Form 17-129); USDA-APHIS Agreement of Pet Bird Owner (VS Form 17-8); application of seals and agreements; notarized declaration or affirmation; notification of signs of disease in a recently imported bird; cooperative service agreements, and recordkeeping by processing establishments.

This notice includes a description of the information collection requirements currently approved by the Office of Management and Budget (OMB) for HPAI, all subtypes, and Newcastle disease under number 0579-0367, and for HPAI, subtype H5N1, under number 0579-0245. After OMB approves and

combines the burden for both collections under one collection (number 0579-0245), the Department will retire number 0579-0367.

We are asking OMB to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.419 hours per response.

Respondents: Owners of U.S.-origin pet birds and performing or theatrical birds or poultry returning to the United States, and U.S. importers of bird and poultry carcasses, parts, unprocessed products and byproducts of birds and poultry (bird blood, bird tissues, etc.) from certain regions.

Estimated annual number of respondents: 1,680.

Estimated annual number of responses per respondent: 1.5.

Estimated annual number of responses: 2,519.

Estimated total annual burden on respondents: 1,055 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 5th day of August 2013.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.
