

driving; (7) use of situational awareness monitoring for marine mammal presence; (8) use of sound field verification monitoring; (9) use of ramp-up acoustic sources during HRG surveys; (10) implementation of vessel separation zones between marine mammals and project vessels; (11) use of PAM within the vessel transit corridor for Project vessels to travel over 10 knots (11.5 miles per hour); and (12) implementation of additional Vessel Strike Avoidance measures to reduce the risk of a vessel collision with a marine mammal. Additionally, NMFS may modify the LOA's mitigation, monitoring, or reporting measures, based on new information, when appropriate (see also 50 CFR 217.287(c)). Empire Wind is also required to submit reports, as specified in the final rule.

Based on the findings and information discussed in the preamble of the final rule, the take authorized in the LOA will have a negligible impact on marine mammal stocks, will not have an unmitigable adverse impact on the availability of the affected marine mammal stock for subsistence uses, and the mitigation measures provide a means of affecting the least practicable adverse impact on the affected stocks and their habitat.

Program. The CR Program was implemented on April 1, 2005 (70 FR 10174, March 2, 2005). The CR Program is a limited access privilege program that allocates the harvest of crab fisheries managed under the Fishery Management Plan for Bering Sea and Aleutian Islands King and Tanner Crabs (FMP) among harvesters, processors, and coastal communities. Regulations implementing the FMP and the CR Program are at 50 CFR part 680. Information on the CR Program is posted on the NMFS Alaska Region website at <https://www.fisheries.noaa.gov/alaska/sustainable-fisheries/bering-sea-and-aleutian-islands-crab-rationalization-program>.
