SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a regular submission (extension of a currently approved information collection).

The National Marine Fisheries Service (NMFS) Southeast Region manages the U.S. fisheries in the exclusive economic zone (EEZ) of the South Atlantic, Caribbean, and Gulf of Mexico regions under various Fishery Management Plans (FMPs). The Regional Fishery Management Councils prepared the FMPs pursuant to the Magnuson-Stevens Fishery Conservation and Management Act. The regulations implementing the FMPs are located at 50 CFR part 622.

The recordkeeping and reporting requirements at 50 CFR part 622 form the basis for this collection of information. The NMFS Southeast Region requests information from the shrimp fishery participants to certify individual Bycatch Reduction Devices (BRDs). This information, upon receipt, results in an increasingly more efficient and accurate database for management and permitting of the fisheries in the EEZ off the South Atlantic, Caribbean, and Gulf of Mexico.

II. Method of Collection

Paper applications, electronic reports, and telephone calls are required from participants, and methods of submittal include internet, electronic forms, and facsimile transmission of paper forms.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

The Cooperative Game Fish Tagging Program was initiated in 1971 as part of a comprehensive research program resulting from passage of Public Law 86-359, Study of Migratory Game Fish, and other legislative acts under which the National Marine Fisheries Service (NMFS) operates. The Cooperative Tagging Center attempts to determine the migration patterns of, and other biological information for, billfish, tunas, and swordfish. The fish tagging report is provided to the angler with the tags, and he/she fills out the card with the information when a fish is tagged and mails it to NMFS. Information on each species is used by NMFS to determine migratory patterns, distance traveled, stock boundaries, age, and growth. These data are necessary input for developing management criteria by regional fishery management councils, states, and NMFS.

II. Method of Collection

This request is for extension of a currently approved collection. U.S. fishermen, participating in the Pacific albacore tuna fishery, are required to obtain a Highly Migratory Species Fishery Management Plan and/or a High-Seas Fishery Compliance Act permit. A requirement for the permits is to complete and submit logbooks documenting their daily fishing activities, including catch and effort for each fishing trip.
