SUPPLEMENTARY INFORMATION: The United States and Jordan announced the establishment of the Joint Forum when they signed the Joint Statement on October 24, 2000, along with the FTA. The Joint Forum meets regularly and advances environmental protection in Jordan by developing environmental technical cooperation initiatives, which take into account environmental priorities, and which are agreed to by the governments. In paragraph 4 of the Joint Statement, the countries identified an initial focus of technical cooperation on Jordanian environmental quality issues and the development and effective implementation of Jordanian environmental laws, as defined in Articles 5.4 and 18.2(a) of the FTA.

The Joint Forum has met three times since 2000: In 2004, 2009, and 2012, and issued three documents to implement the Joint Statement. The United States anticipates the 2014–2017 Work Program will build upon this prior cooperation. The September 2004 Plan of Action focused on implementing the strategic vision of Jordan’s Ministry of Environment, established in 2002, to promote sustainable economic growth and development. The plan outlined activities to, among other things, strengthen the Ministry’s capacity for setting, implementing, and ensuring compliance with environmental standards; harness market forces to protect the environment while bringing economic benefits; undertake industrial wastewater treatment and hazardous waste management for a target region; seek out economic benefits of ecotourism; and promote the development of a regional network of environmental lawmakers and enforcement officials. During the second Joint Forum in March 2009, the governments agreed on the 2008–2011 Work Program, which largely continued the previous areas for cooperation. In March 2012, the governments issued the most recent Work Program for 2012–2013 with the following priority areas of cooperation: (1) Institutional and policy strengthening for effective implementation and enforcement of environmental laws, including natural resource-related laws; (2) biodiversity conservation and improved management of protected areas and other ecologically important ecosystems; (3) improved private sector
