

inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: 5900–576.

Respondents/affected entities:

Taconite iron ore processing facilities.

Respondent's obligation to respond:

Mandatory (40 CFR part 63, subpart RRRRR).

Estimated number of respondents: 8 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 1,230 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$584,000 (per year), which includes \$0 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates is due to a correction of the number of respondents per year performing Method 5 performance tests to be consistent with the number of respondents estimated to provide notifications of performance tests and report performance test results. This ICR adjusts the number of respondents conducting performance tests in each year from 2.7 per year to 8 per year, which increases the annual burden by approximately 300 hours. There is no change in the capital/startup vs. operation and maintenance (O&M) costs as calculated in section 6(b)(iii) compared with the costs in the previous ICR.

Abstract: This is an extension of the current Information Collection Request (ICR) for the Diesel Emissions Reduction Act program (DERA) authorized by Title VII, Subtitle G (Sections 791 to 797) of the Energy Policy Act of 2005 (Pub. L. 109–58), as amended by the Diesel Emissions Reduction Act of 2010 (Pub. L. 111–364) and Division S (Section 101) of the Consolidated Appropriations Act, 2021 (Pub. L. 116–260), codified at 42 U.S.C. 16131 *et seq.* DERA provides the Environmental Protection Agency (EPA) with the authority to award grants, rebates or low-cost revolving loans on a competitive basis to eligible entities to fund the costs of projects that significantly reduce diesel emissions from mobile sources through implementation of a certified engine configuration, verified technology, or emerging technology. Eligible mobile sources include buses (including school buses), medium heavy-duty or heavy heavy-duty diesel trucks, marine engines, locomotives, or nonroad engines or diesel vehicles or equipment used in construction, handling of cargo (including at ports or airports), agriculture, mining, or energy production. In addition, eligible entities may also use funds awarded for programs or projects to reduce long-duration idling using verified technology involving a vehicle or equipment described above. The objective of the assistance under this program is to achieve significant reductions in diesel emissions in terms of tons of pollution produced and reductions in diesel emissions exposure, particularly from fleets operating in areas designated by the Administrator as poor air quality areas. EPA uses approved procedures and forms to collect necessary information to operate its grant and rebate programs. EPA has been providing rebates under DERA since Fiscal Year 2012. EPA is requesting an extension of the current ICR, which is approved through June 30, 2022, for forms needed to collect necessary information to operate a rebate program as authorized by Congress under the DERA program.

As part of this extension, EPA is revising the ICR to address the needs of the Clean School Bus (CSB) Program. This program is authorized by Title XI, Section 71101 of the Infrastructure Investment and Jobs Act (Pub. L. 117–58). The new program, like DERA,

allows for rebates and grants for school bus replacement projects that reduce emissions.

EPA will collect information from applicants who wish to apply for a rebate under DERA or CSB. Information collected from applicants will ensure that they are eligible to receive funds, that funds are provided for eligible activities, and to satisfy the reporting requirements of DERA and CSB.

Form Numbers: 2060–0686.

Respondents/affected entities: Those interested in applying for a rebate under EPA's Diesel Emission Reduction Act (DERA) or Clean School Bus (CSB) Program and include but are not limited to the following NAICS (North American Industry Classification System) codes: 23 Construction; 482 Rail Transportation; 483 Water Transportation; 484 Truck Transportation; 485 Transit and Ground Passenger Transportation; 4854 School and Employee Bus Transportation; 48831 Port and Harbor Operations; 61111 Elementary and Secondary Schools; 61131 Colleges, Universities, and Professional Schools; 9211 Executive, Legislative, and Other Government Support; and 9221 Justice, Public Order, and Safety Activities.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 3,000 (total).

Frequency of response: Voluntary as needed.

Total estimated burden: 17,287 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$732,996.58 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in the total estimated respondent burden compared with the ICR currently approved by OMB.
