Rochester Gas and Electric Corporation; Notice of Availability of Draft Environmental Assessment

December 21, 2000.

A Draft Environmental Assessment (DEA) is available for public review. The DEA is for an application to surrender the license for the Station 160 Hydroelectric Project. The DEA finds that approval of the application, to include certain actions recommended by Commission staff, would not constitute a major federal action significantly affecting the quality of the human environment. The Station 160 Project is located on the Genesee River in Livingston County, New York.

The DEA was written by staff in the Office of Energy Projects, Federal Energy Regulatory Commission. Copies of the DEA can be obtained by calling the Commission's Public Reference Room at (202) 208-1371.

Please submit any comments on the DEA within 40 days from the date of this notice. Any comments, conclusions, or recommendations that draw upon studies, reports, or other working papers of substance should be supported by appropriate documentation. Comments should be addressed to: The Secretary,

Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. Please affix Project No. 2596-004 to all comments. Title: Transition Program for Equipment Manufacturers (OMB Control No. 2060-0369; EPA ICR No.

1826.02) expiring on April 30, 2001, renewal.

Abstract: In August 1998, EPA promulgated new regulations for nonroad compression-ignited engines which established emission standards (Tier I standards) for engines under 37 kW, and tightened existing standards (Tier II standards) for engines above 37 kW. These regulations are likely to cause some engine design changes. During the rulemaking process, some equipment manufacturers expressed concerns about delays in notification from engine manufacturers about engine design changes. These design changes can create problems in fitting the engine to the equipment. Subsequently, equipment manufacturers would be unable to sell the volume of equipment they planned for, since they would need to redesign their equipment before any products could be sold. In response to these concerns, EPA created a Transition Program for Equipment Manufacturers (TPEM) in an effort to provide original equipment manufacturers (OEMs) with some flexibility in complying with the regulations. Under the program, OEMs are allowed to use a number of noncompliant engines (uncertified engines rated below 37 kW or Tier I engines rated at or above 37 kW) in their equipment for up to seven years.

Participation in the program is voluntary. Participating OEMs and engine manufacturers who provide the noncompliant engines to the OEMs are required to keep records and submit reports of their activities under the program. The information is collected by the Engine Programs Group, Certification and Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation. Confidentiality to proprietary information is granted in accordance with the Freedom of Information Act, EPA regulations at 40 CFR part 2, and class determinations issued by EPA's Office of General Counsel. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the
