#### Abstract of Information Available

Based on the information available, human remains representing, at least, five individuals have been reasonably identified. No associated funerary objects are present. These ancestral remains were recovered from the Millington Site (41PS14) in Presidio, Texas. They were salvaged in 2006 during a construction project by the city of Presidio from a backhoe trench initiated by the Presidio Sewer Line project. Geographical affiliation is consistent with the historically documented territory of the Mescalero Apache but biological genetic data from nearby sites places the Lineal Descendants of La Junta de los Rios, in particular lineal descendant Xoxi Nayapiltzin, near the site at least 900 years ago contemporaneous with the known age of these ancestral remains. No Preservative was applied to any of the ancestral remains.

#### Lineal Descendant

Based on the information available and the results of consultation, a lineal descendant is connected to the human remains described in this notice.

#### Determinations

The Center for Big Bend Studies, Sul Ross State University has determined that:

- The human remains described in this notice represent the physical remains of five individuals of Native American ancestry.

- Xoxi Nayapiltzin is connected to the human remains described in this notice.
