SUPPLEMENTARY INFORMATION:

I. Abstract

NOAA has established a program to reduce excess fishing capacity by paying fishermen to (1) surrender their fishing permits or (2) both, surrender their permits and either scrap their vessels or restrict vessel titles to prevent fishing. Buybacks can be funded by a Federal loan to the industry or by direct Federal or other funding. Depending upon the type of buyback involved, the program can entail the submission of buyback requests by industry, the submission of bids, referenda if fishery participants, and reporting of the collection of fees to repay a Federal loan. For buybacks involving State-managed fisheries, the State may need to develop the buyback plan and comply with other information requirements.

In its request for renewed Paperwork Reduction Act approval NOAA will also request the merger of referenda requirements currently approved under 0648-0413 and the addition of a provision that would allow the public 30 days to advise of any holder or owner claims that conflict with accepted bidders' representations about reduction permit ownership or reduction vessel ownership.

SUPPLEMENTARY INFORMATION:

I. Abstract

As required in the reasonable and prudent measures in the Endangered Species Act, Section 7 biological opinion on the effects of the Bering Sea and Aleutian Islands and Gulf of Alaska pollock, Atka mackerel, and Pacific cod fisheries on the endangered Steller sea lions, National Marine Fisheries Service (NMFS) has implemented changes to information collected from fishery participants. Any vessel that is registered for directed fishing for Pacific cod, pollock, and Atka mackerel in the exclusive economic zone off Alaska must install a vessel monitoring system (VMS) unit and operate the VMS while directed fishing for each of the species. The VMS unit automatically transmits location information every 20 minutes. NOAA uses the information for determining vessel locations and enforcing the closure of areas of critical habitat. Participants must also fax NOAA a check-in report when a VMS unit has been installed.

II. Method of Collection

The position reports are electronic and automatic. Check-in reports must be faxed.
