

### Alternatives

The preferred alternative is the most practical alternative to meet the purpose and needs of this action. Three alternatives were considered: (1) No Action, (2) Decommission the Structure, and (3) Structure Rehabilitation.

### Consultation—Public Participation

Meetings were held with the project sponsors in June, July, and December of 2001, and April of 2002. On April 23, 2002, the sponsors held a public meeting. In addition, letter requests for concerns and issues were sent to federal and state agencies, and organizations. All concerns and issues were addressed in the environmental assessment.

### Conclusion

The environmental assessment summarized above indicates that this Federal action will not cause significant local, regional, or national impacts on the human environment. Therefore, based on the above findings, I have determined that an environmental impact statement is not required for the rehabilitation of the Upper Hocking Watershed Structure R-23.

Dated: August 30, 2002.
