INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731-TA-847 and 849 (Second Review)]

Carbon and Alloy Seamless Standard, Line, and Pressure Pipe From Japan and Romania

Determinations

On the basis of the record¹ developed in the subject five-year reviews, the United States International Trade Commission (Commission) determines, pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)), that revocation of the antidumping duty orders on carbon and alloy seamless standard, line, and pressure pipe from Japan and Romania would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.²

Background

The Commission instituted these reviews on April 1, 2011 (76 FR 18251) and determined on July 5, 2011 that it would conduct expedited reviews (76 FR 44608, July 26, 2011).

The Commission transmitted its determinations in these reviews to the Secretary of Commerce on September 22, 2011. The views of the Commission are contained in USITC Publication 4262 (September 2011), entitled *Carbon and Alloy Seamless Standard, Line, and Pressure Pipe from Japan and Romania: Investigation Nos. 731-TA-847 and 849 (Second Review)*.

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor (Department or DOL), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA) [44 U.S.C. 3505(c)(2)(A)]. SUPPLEMENTARY INFORMATION:

I. Background

This baseline information collection supports an evaluation of the impacts of the Green Jobs and Health Care (GJHC) training grants. This evaluation is sponsored by ETA for worker training and placement in high growth and emerging industries through training grants funded by the 2009 Recovery Act, which was enacted in an effort to preserve and create jobs, promote economic growth, and assist those impacted by the recession. The Recovery Act included funding for four Solicitations for Grant Applications (SGAs) with the goal of training workers in the skills required to be employed in specific high-growth and emerging industries including health care, energy efficiency, and renewable energy. Two of these four SGAs that are the focus of this study, for which baseline data must be collected, are:

- Pathways Out of Poverty (POP) (\$150 million for 38 projects).
- Health Care and Other High Growth Emerging Industries (HHG) (\$225 million for 55 projects).

The overall aim of this evaluation is to determine the extent to which enrollees achieve increases in employment, earnings, and career advancement because of their participation in the training provided by POP and HHG grantees and to identify promising best practices and strategies

for replication. Individuals enrolling in the GJHC training programs have a 50/50 chance of receiving these services. Those individuals not receiving the training services receive the existing services offered by the grantee. Education, employment, and other outcomes of the two groups will be compared over time to evaluate the GJHC training grant impact. The evaluation will estimate the success in providing educational and occupational skills training that fosters entry into job fields that are innovative and/or experiencing high growth, as in health care industry.

II. Review Focus

The Department is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
