### Office of the National Coordinator for Health Information Technology; American Health Information Community Biosurveillance Workgroup Meeting

**ACTION:** Announcement of meeting.

**SUMMARY:** This notice announces the twelfth meeting of the American Health Information Community Biosurveillance Workgroup in accordance with the Federal Advisory Committee Act (Pub. L. No. 92-463, 5 U.S.C., App.).

**DATE:** December 8, 2006 from 1 p.m. to 4 p.m.

**ADDRESSES:** Mary C. Switzer Building (330 C Street, SW., Washington, DC 20201), Conference Room 4090 (please bring photo ID for entry to a Federal building).

**FOR FURTHER INFORMATION CONTACT:**

[http://www.hhs.gov/healthit/ahic/bio\\_main.html](http://www.hhs.gov/healthit/ahic/bio_main.html).

**SUPPLEMENTARY INFORMATION:** Discuss expanding the scope of the workgroup to encompass population health and give input into draft recommendations for AHIC.

The meeting will be available via Web cast at [http://www.hhs.gov/healthit/ahic/bio\\_instruct.html](http://www.hhs.gov/healthit/ahic/bio_instruct.html).

Dated: November 13, 2006.

**Judith Sparrow,**

Director, American Health Information Community, Office of Programs and Coordination, Office of the National Coordinator for Health Information Technology.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### National Institute of Environmental Health Sciences (NIEHS); Workshop: Children's Environmental Health: Past, Present and Future Research Strategies

**AGENCY:** National Institutes of Health (NIH), HHS.

**ACTION:** Workshop Announcement.

**SUMMARY:** On January 22-23, 2007, the NIEHS is hosting a workshop titled "Children's Environmental Health Research: Past, Present, and Future." The goal of this workshop is to develop new strategies for research, exposure

and effects monitoring, intervention and prevention in children's environmental health. Specific objectives are to maximize the effectiveness of scientific research—basic science, exposure monitoring/biomonitoring, epidemiology, toxicology, clinical medicine and multidisciplinary studies—and to enhance the translation of research to the bedside, to the community and to public policy. This meeting is open to the public with attendance limited only by the space available. Time will be set aside for public discussion. Additional information about the workshop and on-line registration are available from the NIEHS Web site at <http://www.apps.niehs.nih.gov/conferences/od/cehr/>.

The first day will begin with discussions of two case studies that demonstrate the successful implementation of evidence-based intervention/prevention strategies that became possible once links between environmental exposures and a disease in children had been identified. The first case study will focus on lead and neurotoxicity. Findings on the adverse effects of lead on neurodevelopment ultimately led to efforts to reduce exposures to lead. Asthma will be used as a second case study because it provides a clear example of environmental triggers and some science-based prevention/intervention strategies that are already being implemented. The second day of the workshop will focus on applying lessons learned from the two "success"
