Regulations and other practices that do not reasonably advance safety, but instead promote unscientific ideological agendas, create unnecessary burdens and costs, restrict consumer choice, or reduce competition, entrepreneurship, and innovation—and thereby restrain the American economy—should generally be eliminated or modified.

The Commission encourages members of the public—including consumers, manufacturers, retailers, potential market entrants, and others—to comment on ways to reduce burdens and costs of its existing rules, regulations, guidance, interpretations, or practices without increasing the risk of death or injury to consumers.

The Commission requests information and data in support of each suggestion. To submit your ideas and comments, please follow the instructions in the **ADDRESSES** section of this document.¹

Secretary, Consumer Product Safety Commission.
