Needs and Uses: In the First Report and Order (R&O) issued in CC Docket No. 99-273, the Commission adopts several of its tentative conclusions. The Commission concludes that local exchange carriers must provide competing directory assistance (DA) providers that qualify under section 251 of the Communications Act, with nondiscriminatory access to the LECs local directory assistance databases, and must do so at nondiscriminatory and reasonable rates. The Commission determined that LECs are not required to grant competing DA providers nondiscriminatory access to non-local directory assistance databases.

These modifications include the use of Major Trading Areas (MTA's) for future licensing, the establishment of a "substantial service" alternative to our construction benchmarks, and modifications to certain provisions of our narrowband PCS competitive bidding rules. The information collection requirements are used to ensure that licensees quickly construct their systems and that the systems serve significant areas.
