

Changes in Estimates: There is a decrease of 12,608 hours in total estimated respondent burden compared with the ICR currently approved by OMB. The decrease reflects an adjustment in the number of respondents from the previous ICR, an adjustment of labor rates and capital costs to reflect 2017 dollars, and a complete re-evaluation of the activities and costs associated with all subparts of the GHGRP. This decrease also reflects the removal of burden hours from collection of GHG-related data for mobile sources, which are now captured in other EPA ICR vehicles including OMB Control Nos. 2060-0287, 2060-0292, 2060-0338, 2060-0641, 2060-0680, and 2060-0710.
