Proposed Collection: National Toxicology Program (NTP) Level of Concern Categories, 0925–NEW, National Institute of Environmental Health Sciences (NIEHS), National Institutes of Health (NIH).

Need and Use of Information
Collection: The NTP has used a 5-point
level of concern (LoC) framework to
communicate NTP's assessment of the
degree of concern regarding the
potential human health effects of
selected substances given what is
known about their toxicity, level of
human exposure, and pharmacokinetics.
As part of its systematic review
methodologies, the NTP is updating its
LoC framework to enhance transparency
in what the LoC categories mean,
describing the factors considered in
reaching conclusions and identifying

strategies for improving their use as a risk communication tool. This study will use expert solicitation from five NTP stakeholder sectors (academia, industry, non-government organizations, and federal and state agencies) to aid in determining the optimal number of LoC categories for an updated LoC framework. Information about this project was presented to the NTP Board of Scientific Counselors on June 16, 2015. Materials describing the project, including slides and summary minutes from the meeting, are available at http://ntp.niehs.nih.gov/go/9741.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 620.

ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Type of respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total annual burden hour
Study Consent		200 200	1 2	6/60 90/60	20 600
Total		200	600		620
