ADDRESSES: Comments should be sent to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. Your comment must be submitted into www.reginfo.gov per the above instructions for it to be considered. In addition to submitting in www.reginfo.gov also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to PRA@fcc.gov and to Cathy.Williams@fcc.gov. SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the

following information collection.

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, not-for-profit institutions, and State, local, or Tribal governments.

Number of Respondents and Responses: 5,022 respondents; 217,658 responses.

Estimated Time per Response: 0.5 hour–10 hours.

Frequency of Response: On occasion reporting requirement and third-party disclosure requirement.

Total Annual Burden: 144,217 hours.

Total Annual Cost: No cost.

Needs and Uses: This information facilitates efficient interaction between premises owners and local exchange carriers (LECs) regarding the placement of the demarcation point, which marks the end of wiring under control of the LEC and the beginning of wiring under the control of the premises owner or subscriber. The demarcation point is a critical point of interconnection where competitive LECs can gain access to the inside wiring of the building to provide service to customers in the building. This collection also helps ensure that fixed wireless antennas covered by the OTARD rule comply with the Commission's limits on radiofrequency exposure and provides the Commission with information on the state of the

market. In short, this collection helps foster competition in local telecommunications markets by ensuring that competing telecommunications providers can provide services to customers in multiple tenant environments.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is adopting a proposal to extend for three years, without revision, the Report of Institution-to-Aggregate Granular Data on Assets and Liabilities on an Immediate Counterparty Basis (FR 2510; OMB No. 7100–0376).

Final Approval Under OMB Delegated Authority of the Extension for Three Years, Without Revision, of the Following Information Collection

Report title: Report of Institution-to-Aggregate Granular Data on Assets and Liabilities on an Immediate Counterparty Basis.

Agency form number: FR 2510.

OMB control number: 7100–0376.

Frequency: Quarterly.

Respondents: Any bank holding company (BHC) that is organized under the laws of the United States or any U.S. state and that is identified as a global systemically important bank (G–SIB) holding company under the Board's Regulation Q.

Estimated number of respondents: 8.

Estimated average hours per response: 568.

Estimated annual burden hours: 18,176.

General description of report: The FR 2510 collects granular exposure data on the assets, liabilities, and off-balance sheet holdings of G–SIBs, providing breakdowns by country, instrument, currency, maturity, sector, and other factors, and also collects country exposure data on an immediate counterparty basis and detailed information on firms' derivatives exposures. The information collected by the FR 2510 supports the Board's supervision of U.S. G–SIBs by allowing for a more complete balance sheet analysis of these firms and allows the Board to more closely monitor the systemic impacts of such firms' activities and investments.

Legal authorization and confidentiality: The FR 2510 is authorized by section 5 of the Bank Holding Company Act (BHC Act). Section 5 of the BHC Act authorizes the Board to require a bank holding company and any subsidiary of such company to submit reports under oath to keep the Board informed as to its financial condition, systems for monitoring and controlling financial and operating risks, and transactions with depository institution subsidiaries of the bank holding company.¹ The FR 2510 is mandatory for U.S. G–SIBs.

The information collected in the FR 2510 is collected as part of the Board's supervisory process and is therefore considered confidential pursuant to exemption 8 of the Freedom of Information Act (FOIA), which protects information contained in "examination, operating, or condition reports"

obtained in the bank supervisory process. In addition, individual respondents may request that information be kept confidential pursuant to exemption 4 of the FOIA, which protects nonpublic commercial or financial information, which is both customarily and actually treated as private by the respondent. Determinations of confidentiality based on exemption 4 of the FOIA would be made on a case-by-case basis.

Current actions: On October 18, 2021, the Board published a notice in the **Federal Register** (86 FR 57672) requesting public comment for 60 days on the extension, without revision, of the Report of Institution-to-Aggregate Granular Data on Assets and Liabilities on an Immediate Counterparty Basis. The comment period for this notice expired on December 17, 2021. The Board received one comment.

Detailed Discussion of Public Comments

First, the commenter identified certain reporting differences between the Country Exposure Report (FFIEC 009; OMB No. 7100–0035) and the FR 2510 and argued that reporting of similar items between the two reports should be more aligned in order to minimize reporting burden. Specifically, the commenter highlighted the difference in remaining maturity on debt securities held for trading between the FFIEC 009 and the FR 2510. On the FFIEC 009, only a single bucket containing maturities of one year or less is required, whereas the FR 2510 requires four maturity buckets across the entire term structure. While the Board acknowledges the additional burden in reporting all maturity buckets in the FR 2510, this was part of the original design of the report and was meant to "provide significantly more detail regarding the balance sheet and derivatives exposures of U.S. G–SIBs."² This original design was part of an internationally agreed upon process to facilitate the aggregation and analysis of consistent and comparable data from G–SIBs globally. In addition, the FR 2510 collects a more fulsome set of remaining maturity information to better understand the credit market and liquidity profiles of U.S. G–SIBs, which may have systemic implications at the individual institution level or the aggregate level. The FFIEC 009, on the other hand, collects overall country risk exposures for banks of all sizes and such detail is not needed for smaller institutions.
