

the western tier are sold. Additional prohibitions imposed by the FFA, Refuge Act, and ROD include the use of the western tier parcel for residential, industrial, and agricultural purposes, for hunting or fishing for consumptive purposes, and the use of any surface water as a water source.

Based on the extensive investigations and risk assessment performed for the western tier of the RMA/NPL Site, there are no further response actions planned or scheduled for this area. Currently, no hazardous substances remain at the site above health-based levels with respect to anticipated uses of and access to the site, which are limited under the Federal Facility Agreement, Rocky Mountain Arsenal National Wildlife Refuge Act and the ROD. Because the western tier parcel is subject to these restrictions on land and water use, it will be included in the RMA-wide five-year reviews. All completion requirements for the western tier of the On-Post OU have been achieved as outlined in OSWER Directive 9320.2-3A. Therefore, there is no requirement for operation and maintenance.

EPA, with concurrence from the State of Colorado, has determined that all appropriate CERCLA response actions have been completed at the western tier parcel of the RMA/NPL Site to protect public health and the environment and that no further response action by responsible parties is required. Therefore, EPA proposes to delete the western tier of the On-Post OU of the RMA/NPL Site from the NPL.

Dated: September 10, 2002.
