

Section 529 of the Energy Independence and Security Act of 2007 (EISA)¹ directed the Commission to develop a National Action Plan on Demand Response (National Action Plan). The purpose of these technical conferences is to elicit further input from interested stakeholders on the possible elements of the National Action Plan as discussed in the *Discussion Draft on Possible Elements of a National Action Plan on Demand Response* (Discussion Draft) to be released for comment prior to the technical conferences. The Discussion Draft will be noticed at <http://www.ferc.gov> when it is available. In addition, the Commission seeks input from a broad range of industry stakeholders, state regulatory utility commissioners, and non-governmental groups regarding the best ways to meet the objectives that Congress identified for the National Action Plan: (1) Identification of requirements for technical assistance to States to allow them to maximize the amount of demand response resources that can be developed and deployed; (2) design and identification of requirements for implementation of a national communications program that includes broad-based customer education and support; (3) development or identification of analytical tools, information, model regulatory provisions, model contracts, and other support materials for use by customers, States, utilities and demand response providers.² Commission Staff will draw on the comments received and the discussion at the technical conferences to prepare a draft of the National Action Plan.

There will be panel sessions in the morning of the technical conferences to discuss the overall approach to and scope of the National Action Plan, followed by afternoon breakout sessions that will focus on each of the three statutory objectives above. A closing plenary session will summarize the break-out discussions to identify possible areas of consensus.

Those interested in speaking on the morning panels at the conferences should notify the Commission by September 25, 2009 by completing an online form describing the elements that they will address: for Washington, <https://www.ferc.gov/whats-new/registration/nap-10-22-speaker-form.asp>; for Portland, <https://www.ferc.gov/whats-new/registration/nap-10-27-speaker-form.asp>. Due to

time constraints, we may not be able to accommodate all those interested in speaking on panels. Panel speakers will be invited so as to balance stakeholder interests. However, all conference attendees are invited to participate in the break-out session discussions and the plenary session. A detailed agenda, including panel speakers, will be published at a later date.

The technical conferences represent one of the means for stakeholders to provide input on the National Action Plan. Those interested will also have an opportunity to submit comments on the Discussion Draft and the technical conferences. The Commission will establish the comment period and provide instructions for submitting comments at a later date.

The morning panel sessions and the plenary session of the conferences will be transcribed. Transcripts of the conferences will be immediately available for a fee from Ace-Federal Reporters, Inc. (202-347-3700 or 1-800-336-6646). A free Web cast of the morning panel sessions and the closing plenary session of the Washington conference will be available. A free Web cast (audio only) of the morning panel sessions and the closing plenary session of the Portland conference will be also available. Anyone with Internet access interested in listening to the Washington conference or Portland conference can do so by navigating to <http://www.ferc.gov>'s Calendar of Events and locating the appropriate event in the Calendar. The events will contain a link to the applicable Web cast option. The Capitol Connection provides technical support for the Washington Web casts and offers the option of listening to the conferences via phone-bridge for a fee. If you have any questions, visit <http://www.CapitolConnection.org> or call 703-993-3100. The transcripts will be available for free on the Commission's eLibrary system and on the Calendar of Events approximately one week after the conference.

There is an "eSubscription" link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority, Comments Requested

September 15, 2009.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, 44 U.S.C. 3501—3520. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Persons wishing to comment on this information collection should submit comments November 27, 2009. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget (OMB), via fax at 202-395-5167, or via the Internet at

Nicholas.A.Fraser@omb.eop.gov and to *Judith.B.Herman@fcc.gov*, Federal Communications Commission (FCC). To submit your comments by e-mail send them to: *PRA@fcc.gov*.

The Commission is reporting no change in their burden estimates.

The Commission has established rules for the marketing and authorization of

radio frequency (RF) devices under guidelines in 47 CFR Part 2, Section 2.803. The general guidelines in Section 2.803 prohibit the marketing or sale of such equipment prior to a demonstration of compliance with the applicable equipment authorization and technical requirements in the case of a device subject to verification or Declaration of Conformity.

The following general guidelines apply for third party notifications:

(a) A RF device may be advertised and displayed at a trade show or exhibition prior to a demonstration of compliance with the applicable technical standards and compliance with the applicable equipment authorization procedure provided the advertising and display is accompanied by a conspicuous notice specified in Section 2.803(c).

(b) An offer for sale solely to business, commercial, industrial, scientific, or medical users of an RF device in the conceptual, developmental, design or pre-production stage prior to demonstration of compliance with the equipment authorization regulations may be permitted provided that the prospective buyer is advised in writing at the time of the offer for sale that the equipment is subject to FCC rules and that the equipment will comply with the appropriate rules before delivery to the buyer or centers of distribution.

(c) There are no FCC requirements for how this notice of compliance is to be phrased.

The information to be disclosed about marketing of the RF device is intended:

(a) To ensure the compliance of the proposed equipment with Commission rules; and

(b) To assist industry efforts to introduce new products to the marketplace more promptly.

The information disclosure applies to a variety of RF devices that:

(a) Is pending equipment authorization or verification of compliance;

(b) May be manufactured in the future; and

(c) Operates under varying technical standards.

The information disclosed is essential to ensuring that interference to radio communications is controlled.
