Title: DHHS/ACF/OPRE Head Start Classroom-based Approaches and Resources for Emotion and Social skill promotion (CARES) project: Tracking Participants.

OMB No.: 0970-0364.

Description: The Head Start Classroom-based Approaches and Resources for Emotion and Social skill promotion (CARES) project is an evaluation of three social emotional program enhancements within Head Start settings serving three- and four-year-old children. This project focuses on identifying the central features of effective programs to provide the information federal policy makers and Head Start providers will need if they are to increase Head Start's capacity to improve the social and emotional skills and school readiness of preschool age children. The Head Start CARES project completed data collection for cohort (1) 4-year-olds and cohort (2) 3-year-olds in

spring of 2011 and cohort (2) 4-year-olds in the spring of 2012.

ACF is proposing to collect information necessary to identify CARES study respondents' current location and follow-up with respondents until the children reach third grade. In support of an examination of third grade outcomes, information must be collected from parents or guardians until the third grade year. Therefore, in the spring of 2013 tracking of all children will be necessary, in the spring of 2014 for the three- and four-year-old children in cohort 2 only, and in the spring of 2015 the three-year-olds in cohort 2 only. To enable the opportunity to conduct data collection in 3rd grade, complete tracking information on the full sample, both ages and cohorts, for all years until third grade is necessary. In addition to location and contact information, a small set of additional items will provide information on the parents' perception of the children's well-being.

Respondents: The respondents to the tracking phone calls will be low-income parents and their Head Start children. This is a three-year information collection request.
