Submission for OMB Review; Comments Requested

The Department of Agriculture will submit the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13 on or after the date of publication of this notice. Comments are requested regarding: whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including

the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology Comments regarding these information collections are best assured of having their full effect if received by July 31, 2023.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Agricultural Marketing Service

Title: Reporting and Recordkeeping Requirements for 7 CFR, part 29.

OMB Control Number: 0581-0056.

Summary of Collection: The Fair and Equitable Tobacco Reform Act of 2004 (7 U.S.C. 518) eliminated price supports and marketing quotas for all tobacco beginning with the 2005 crop year. Mandatory inspection and grading of domestic and imported tobacco were eliminated as well as the mandatory pesticide testing of imported tobacco and the tobacco Market News Program. The Tobacco Inspection Act (7 U.S.C. 511) requires that all tobacco sold at designated auction markets in the U.S. be inspected and graded. Provision is also made for interested parties to request inspection, pesticide testing and grading services on an "as needed" basis. The Act also provides for the establishment and maintenance of tobacco standards for U.S. grown types and the collection and dissemination of

market news which are funded by appropriated money.

Need and Use of the Information: Information is collected through various forms and other documents for the inspection and certification process. Upon receiving request information from tobacco dealers and/or manufacturers, tobacco inspectors will pull samples and apply U.S. Standard Grades to tobacco samples providing the customer a Tobacco Inspection Certificate (TB-92). Also, samples can be submitted to a USDA laboratory for pesticide testing and a detailed analysis is provided to the customer.

Description of Respondents: Business or other for-profit.

Number of Respondents: 50.

Frequency of Responses: Recordkeeping; Reporting; On occasion.

Total Burden Hours: 3,651.

Agricultural Marketing Service

Title: Discharge and Delivery Survey Summary and Rate Schedule Forms.

OMB Control Number: 0581-0317.

Summary of Collection: The Food for Peace Act (specifically Pub. L. 480 Title II); Section 416(b) of the Agricultural Act of 1949; Food for Progress Act of 1985; 2002 and 2008 Farm Bills authorizing the McGovern-Dole International Food for Education Program; and Commodity Credit Corporation (CCC) Charter Act, all as amended, authorize the International Procurement Division to procure, sell, and transport, as well as sample, inspect and survey, agricultural commodities at both domestic and foreign locations for use in international food aid program. The Kansas City Commodity Office (KCCO) acting under the authority granted by these acts, purchase discharge survey services conducted at the foreign destinations to ensure count and condition of the commodities shipped. Agricultural Marketing Service (AMS) will collect information using forms KC-334, Discharge/Delivery Survey Summary and KC-337, Rate Schedule.

Need and Use of the Information: The information collected on the KC-334 form is a summary of the amount of cargo delivered versus manifested quantity, the amount and type of damage, etc. The KC-337 form is used to obtain rates that the survey companies charge to perform surveys, by country/region. Without the

information CCC could not meet program requirements.

Description of Respondents: Business or other for-profit; Not for-profit institutions.

Number of Respondents: 41.

Frequency of Responses:

Recordkeeping; Reporting: On occasion; Quarterly; Weekly; Semi-annually; Monthly; Annually.

Total Burden Hours: 234.

SUPPLEMENTARY INFORMATION:

Title: Importation of Live Swine, Pork and Pork Products, and Swine Semen From the European Union.

OMB Control Number: 0579-0218.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture, among other things, has the authority to detect, control, or eradicate pests or diseases of livestock or poultry. The Secretary may also prohibit or restrict the import or export of any animal or related material if necessary to prevent the spread of any livestock or poultry pest or disease. Disease prevention is the most effective method for maintaining a healthy animal population and for enhancing APHIS' ability to compete in the world market of animal and animal product trade.

In connection with its disease prevention mission, APHIS regulates the importation of animals and animal products into the United States to guard against the introduction of animal diseases not present or prevalent in the United States. The regulations in 9 CFR parts 93, 94, and 98, prohibit or restrict the importation of specified animals, germplasm, and animal products to prevent the introduction of diseases such as classical swine fever (CSF), foot-and-mouth disease, swine vesicular disease, and African swine fever. In part 93, subpart E, among other things, provides importation requirements for live swine. Sections 94.2, 94.4, 94.8,

94.9, and 94.12 through 94.14 deal with the importation of pork and pork products from regions where these diseases exist. Section 94.10 addresses the requirements for the importation of live swine from regions where CSF exists. Section 94.13 concerns restrictions on the importation of pork or pork products from specified regions. Section 98.38 defines APHIS' requirements for the importation of swine semen.

APHIS determined that breeding swine, pork and pork products, and swine germplasm imported from specific regions of the European Union (EU) in accordance with other APHIS import requirements, pose a low risk of introducing foreign animal diseases into the United States. To further ensure that CSF is not introduced into the United States, regulations in parts 93, 94, and 98 allow, under specified conditions, the importation of live swine, pork and pork products, and swine germplasm from the APHIS-defined EU CSF region. These requirements necessitate the use of several information collection activities, including certification statements for the importation of pork, pork products, live swine, and swine germplasm.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.96 hours per response.

Respondents: Foreign animal health officials and importers of live swine, pork and pork products, and swine semen.
