

The ICR provides a detailed explanation of this estimate, which is only briefly summarized here:

*Estimated total number of potential respondents:* 66.

*Frequency of response:* On occasion.

*Estimated total average number of responses for each respondent:* 1.

*Estimated total annual burden hours:* 1,111 hours.

*Estimated total annual costs:* \$488,570. This includes an estimated burden cost of \$488,570 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

#### IV. Are there changes in the estimates from the last approval?

There is an increase of 420 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects EPA's estimate of the number of applications the Agency will receive annually to add third-party partners and products. This estimate is based on the historical number of respondents that submitted third-party partners and products applications in the last year; this number is expected to remain constant over the next three years. The supporting statement provides additional details on the burden change. This change is an adjustment.

#### V. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
