**SUPPLEMENTARY INFORMATION:****I. Abstract**

The National Marine Fisheries Service (NMFS), Alaska Regional Office, is requesting renewal of the currently approved information collection for the Chinook Salmon Economic Data Report (EDR) Program.

National Marine Fisheries Service (NMFS) manages the Bering Sea pollock fishery under the American Fisheries

Act (AFA) (16 U.S.C. 1851). AFA fishing vessels harvest pollock in the Bering Sea pollock fishery using pelagic trawl gear, which consists of large nets towed through the water by the vessel. At times, Chinook salmon and pollock occur in the same locations in the Bering Sea; consequently, Chinook salmon are incidentally caught in the nets as pollock is harvested. This incidental catch is called bycatch and is also called prohibited species catch (PSC).

The Chinook Salmon EDR Program provides NMFS and the North Pacific Fishery Management Council (Council) with data to evaluate the effectiveness of Chinook salmon bycatch management measures for the Bering Sea pollock fishery that were implemented under Amendment 91 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (75 FR 53026, August 30, 2010). The Chinook Salmon EDR requirements were revised in 2023 to remove third party data verification audits and blind formatting of EDR data (88 FR 7586). The Chinook Salmon EDR Program provides information to the analysts and the Council and is intended to evaluate the effectiveness of the Chinook Salmon Incentive Plan Agreement (IPA) (see OMB Control No. 0648–0401). The Chinook Salmon EDR Program is intended to evaluate where, when, and how pollock fishing and salmon bycatch occur and to provide data to study and verify conclusions drawn by industry in the IPA annual reports.

The Chinook Salmon EDR Program is managed primarily by the Alaska Fisheries Science Center, with support from NMFS Alaska Region, and is administered in collaboration with Pacific States Marine Fisheries Commission. The EDR is a mandatory reporting requirement under 50 CFR 679.65 for all entities participating in the AFA Bering Sea (BS) pollock trawl fishery, including vessel masters and businesses that own or lease one or more AFA-permitted vessels active in fishing or processing BS pollock, Western Alaska Community Development Quota groups receiving allocations of BS pollock, and representatives of sector entities receiving allocations of Chinook salmon PSC from NMFS.

The Chinook Salmon EDR Program consists of three separate forms: (1) Chinook PSC Allocation In-season Compensated Transfer Report—Collects transfer and monetary compensation information for Chinook salmon PSC allocations; (2) Vessel Fuel Survey—Collects fuel consumption and average

fuel costs; and (3) Vessel Master Survey—Collects vessel master impressions of fishing experiences during the year and of Chinook salmon PSC avoidance efforts. These collections are unchanged since the previous revision in 2023.

**II. Method of Collection**

The Compensated Transfer Report, Vessel Fuel Survey, and Vessel Master Survey are completed and submitted using the economic data reporting web application on the Pacific States Marine Fisheries Commission website at <https://www.psmfc.org/chinookedr/>.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The National Marine Fisheries Services (NMFS), Alaska Regional Office, is requesting extension of the currently approved information collection for the Annual Trawl Catcher/Processor Economic Data Report (the EDR).

The EDR collects economic data for the groundfish trawl fleet established by Amendment 80 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area. Amendment 80 primarily allocates several Bering Sea and Aleutian Islands non-pollock trawl groundfish fisheries among fishing sectors, and facilitates the formation of harvesting cooperatives among vessels in the non-American Fisheries Act (non-AFA) Trawl Catcher/Processor Cooperative Program. This program established a limited access privilege program for the non-AFA trawl catcher/processor sector.

Data collected through the EDR includes labor information, revenues received, capital and operational expenses, and other operational or financial data. NMFS and the Council use this to assess the economic effects of Amendment 80 on vessels or entities regulated by the non-AFA Trawl Catcher/Processor Cooperative Program, and impacts of major changes in the groundfish management regime, including allocation of prohibited species catch species and target species to harvesting cooperatives.

The EDR is submitted annually by each person who held an Amendment 80 Quota Share permit or was an owner or leaseholder of an Amendment 80 vessel, or was an owner or leaseholder of a vessel named on a License Limitation Program groundfish license with catcher/processor vessel and trawl gear designations and endorsed for the Gulf of Alaska during a calendar year. The EDR requirements are located at 50 CFR 679.94.

##### II. Method of Collection

Pacific States Marine Fisheries Commission (PSMFC) has been designated by NMFS as the Data Collection Agent. PSMFC mails EDR announcements and filing instructions to respondents by April 1 of each year.

Respondents are encouraged to complete the form online on the PSMFC website at [www.psmfc.org/goatrawl/](http://www.psmfc.org/goatrawl/). The EDR is also available as a fillable PDF on the PSMFC website and may be submitted by mail or fax.
