

of detail for approval applications, test plans, and test reports.

EPA is currently updating these guidance documents and will combine into a single document. This is a new Information Collection Request (ICR) that addresses reporting and recordkeeping requirements found in the updated guidance document identified above. The previous guidance documents released in 1986 were not required to conduct an ICR so a new ICR will be created for the updated guidance. While use of the updated guidance document is voluntary, the PRA still requires the reporting and recordkeeping of this guidance to be determined. This includes reading and using the tables provided in the guidance.

The overall reporting and recordkeeping requirements of a §§ 761.60(e) and 761.70 approval is reported in a separate ICR, ICR No.1446.12 (PCBs, Consolidated Reporting and Recordkeeping Requirements found in docket EPA–HQ–2017–0647). Although this ICR (2596.01) includes a burden increase in terms of reviewing and using the guidance document, EPA notes that the guidance will *reduce* the overall burden in ICR 1446.12 to respondents applying for a PCB disposal approval under §§ 761.60(e) and 761.70 through improved clarification and streamlining of the approval process.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this ICR include respondents applying to the EPA for approval to treat/dispose PCBs using incinerator or an alternative method. This likely includes entities within the Waste Management and Remediation Services (NAICS 562) and Professional, Scientific, and Technical Services (NAICS 54) sectors and includes private entities.

Respondent's obligation to respond: Voluntary, for use in applying to EPA for approval under §§ 761.60(e) or 761.70.

Estimated number of respondents: Estimated eight respondents annually.

Frequency of response: As needed and desired by the respondent in applying to EPA for approval under §§ 761.60(e) or 761.70.

Total estimated burden: Burden is defined at 5 CFR 1320.03(b). The total estimated annual burden on applicants using the guidance is 9.9 hours per applicant.

Total estimated cost: The total estimated annualized labor costs for applicants using the guidance is \$776 per applicant. The annualized capital and O&M costs are \$0.
