

of this information collection in order to obtain the full three-year approval. The Commission has adjusted its burden and cost estimates in order to update the collection burdens necessary to implement a uniform registration process as well as safe and effective lighting procedures for owners of antenna structures.

Section 17.4 includes third party disclosure requirements. Specifically, Section 17.4 requires the owner of any proposed or existing antenna structure that requires notice of proposed construction to the Federal Aviation Administration (FAA) to register the structure with the Commission. This includes those structures used as part of the stations licensed by the Commission for the transmission of radio energy, or to be used as part of a cable television head-end system. An antenna structure must be registered with the Commission if the antenna structure is taller than 200 feet above ground level or may interfere with the flight path of a nearby airport or heliport. Section 17.4(f) provides that antenna structure owners shall immediately provide to all tenant licensees and permittees notification that the structure has been registered. This may be done by providing either a copy of Form 854 or a link to the FCC antenna structure registration website. This notification may be done electronically or via paper mail.

Section 17.4(g) requires antenna structure owners to display the Antenna Structure Registration Number in a conspicuous place that is readily visible near the base of the antenna. This rule specifically requires that the Antenna Structure Number be displayed so that it is conspicuously visible and legible from the publicly accessible area nearest the base of the antenna structure along the publicly accessible roadway or path. Where an antenna structure is surrounded by a perimeter fence, or where the point of access includes an access gate, the Antenna Structure Registration Number should be posted on the perimeter fence or access gate. Where multiple antenna structures having separate Antenna Structure Registration Numbers are located within a single fenced area, the Antenna Structure Registration Numbers must be posted both on the perimeter fence or access gate and near the base of each antenna structure. If the base of the antenna structure has more than one point of access, the rule requires that the Antenna Structure Registration Number be posted so that it is visible at the publicly accessible area nearest each such point of access. The registration number is issued to identify antenna structure owners in order to enforce the

Congressionally mandated provisions related to the owners.

Sections 17.48 and 17.49 contain reporting and recordkeeping requirements. Section 17.48(a) requires that antenna structure owners immediately report outages of top steady burning lights or flashing antenna structure lights to the FAA, if not corrected within 30 minutes. Upon receipt of the outage notification, the FAA will issue a Notice to Airmen (NOTAM), which notifies aircraft of the outage. Consistent with FAA requirements, if a lighting outage cannot be repaired within the FAA's original NOTAM period, Section 17.48(a) further requires the antenna structure owner to notify the FAA of that fact and provide any needed updates to its estimated return-to-service date. The rule also requires antenna structure owners to continue to provide these updates to the FAA every NOTAM period until its lights are repaired.

Section 17.49 requires antenna structure owners to maintain a record of observed or otherwise known extinguishments or improper functioning of structure lights for two years and provide the records to the Commission upon request.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-1287; FR ID 201492]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility;

the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before April 15, 2024. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email PRA@fcc.gov and to nicole.ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418-2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1287.

Title: Secure Telephone Identity Governance Authority Token Revocation Review Process.

Form Number: N/A.

Type of Review: Extension of a currently-approved information collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 50 respondents; 50 responses.

Estimated Time per Response: 24 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Mandatory and required to obtain or retain benefits. The statutory authority for these collections are contained in 47 U.S.C. 227b, 251(e), and 227(e) of the Communications Act of 1934.

Total Annual Burden: 1,200 hours.

Total Annual Cost: No cost.

Needs and Uses: On December 30, 2019, Congress enacted the Pallone-Thune Telephone Robocall Abuse Criminal Enforcement and Deterrence (TRACED) Act. The TRACED Act directed the Commission to require, no

later than 18 months from enactment, all service providers to implement the STIR/SHAKEN caller ID authentication framework in the internet protocol (IP) portions of their networks and implement an effective caller ID authentication framework in the non-IP portions of their networks. To implement the TRACED Act's provisions related to caller ID authentication, the Commission adopted a Report and Order and Further Notice of Proposed Rulemaking on March 30, 2020, which required service providers to implement the STIR/SHAKEN caller ID authentication technology in the IP portions of their phone networks by June 30, 2021. The Commission then adopted a Second Report and Order on September 29, 2020 to further implement the remaining portions of the TRACED Act related to caller ID authentication and STIR/SHAKEN.

On August 5, 2021, the Commission adopted a Third Report and Order, which established a limited role for the Commission to oversee certificate revocation decisions by the private STIR/SHAKEN governance system that would have the effect of placing providers in noncompliance with the Commission's rules. Within the STIR/SHAKEN framework, service providers share a digital certificate along with each call as a means of maintaining trust and accountability. The STIR/SHAKEN governance system can revoke a service provider's access to these digital certificates due to that service provider's violation of a specified list of rules and policies. Because this revocation would place an affected service provider in noncompliance with the Commission's rules, the *Third Report and Order* established an oversight role for the Commission over the governance system's token revocation decisions similar to the one the Commission holds in the context of decisions by the Universal Service Administrative Company. The rules allow for review by the Wireline Competition Bureau in the first instance.

Under the rules adopted in the Third Report and Order, a request for Commission review from a service provider, at a minimum, must contain: (1) a statement setting forth the service provider's asserted basis for appealing the governance system's revocation decision; (2) a full statement of relevant, material facts with supporting affidavits and documentation, including any background information the service provider deems useful to the Commission's review; and (3) the question presented for review, with reference, where appropriate, to any

underlying Commission rule or STIR/SHAKEN governance system policy.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1189.

Title: Signal Boosters, Sections 1.1307(b)(1), 20.3, 20.21(a)(2), 20.21(a)(5), 20.21(e)(2), 20.21(e)(8)(I)(G), 20.21(e)(9)(I)(H), 20.21(f), 20.21(h), 22.9, 24.9, 27.9, 90.203, 90.219(b)(I)(I), 90.219(d)(5), and 90.219(e)(5).

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, Not for profit institutions and Individuals or household.

Number of Respondents and Responses: 632,534 respondents and 635,214 responses.

Estimated Time per Response: .5 hours-40 hours.

Frequency of Response: Recordkeeping requirement, On occasion reporting requirement and Third-party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in 47 U.S.C. 154(i), 303(g), 303(r) and 332.

Total Annual Burden: 324,465 hours.

Total Annual Cost: No cost.

Needs and Uses: The Commission is seeking approval from the Office of Management and Budget (OMB) approval for a three-year time period for this information collection requirements approved under this collection. The following information collection requirements are approved under this collection: Labeling Requirements: Sections 20.21(a)(5), 20.21(f), 90.219(e)(5)—In order to avoid consumer confusion and provide consumers with needed information, the Commission adopted labeling requirements for Consumer and Industrial Signal Boosters. Consumer Signal Boosters must be labeled to identify the device as a "consumer" device and make the consumer aware that the device must be registered; may only be operated with the consent of the consumer's wireless provider; may only be operated with approved antennas and cables; and that E911 communications may be affected for calls served by using the device. Industrial Signal Boosters must include a label stating that the device is not a consumer device, is designed for installation by FCC licensees or a qualified installer, and the operator
