Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks PRA authority to separate the American Time Use Survey (ATUS) Eating and Health Supplement, which was previously collected as part of the master ATUS information collection approved under Control Number 1220–0175, into a new Control Number. The separation will provide greater flexibility in managing this episodic information collection without needing to revisit more permanent aspects of the ATUS. The Eating and Health Supplement module includes questions about peoples’ eating and drinking behaviors, food assistance participation, grocery and meal shopping, food preparation, and food sufficiency. The Supplement also includes questions on general health and physical exercise. Information collected in the Supplement will be published as a public use data set to facilitate research on numerous topics, such as the association between eating patterns, physical activity, and Body Mass Index; time-use patterns of food assistance program participants and low-income nonparticipants; and how time-use varies by health status. The Supplement surveys individuals aged 15 and up from a nationally representative sample.

This proposed information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. For additional information, see the related notice published in the **Federal Register** on July 29, 2013 (78 FR 45567).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Reference Number 201307–1220–005. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including

whether the information will have practical utility;

- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the ETA to conduct quick turnaround surveys on Workforce Investment Act (WIA) related issues. Specifically, this ICR is to clear a generic framework to obtain expedited OMB approval for each ad hoc WIA quick turnaround survey that will focus on an emerging topic of pressing policy interest. Much of the information available to the ETA on key operational issues is impressionistic or anecdotal in nature, based on hearsay or unsystematic observations, and not sufficiently accurate as to national incidence or scope. Obtaining accurate nationwide information through long-term and in-depth evaluation studies often will not provide timely results. The ETA, thus, has an ongoing need for accurate and timely information that can be found only with systematic quick turnaround studies. Depending on the nature of the questions, the ETA would administer surveys at either the state or local workforce area level or some combination of both together. This ICR might entail surveys of State Workforce Agencies, local Workforce Boards, American Job Centers, Employment

Service offices, and offices of other local-area partners.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1205-0436.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on November 30, 2013. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL also notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on August 8, 2013, (78 FR 48464).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1205-0436. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,
