Economic Research Service

Title: Food Security Supplement to the Current Population Survey.

OMB Control Number: 0536–0043.

Summary of Collection: The Food Security Supplement is sponsored by USDA as research and evaluation activity authorized under 7 U.S.C. 2026(a)(1) of the Food and Nutrition Act of 2008. This latter section authorizes the Secretary of Agriculture to enter into contract with private and public institutions to collect data to undertake research that would improve the administration and effectiveness of Supplemental Nutrition Assistance Program (SNAP) in delivering nutrition-related benefits. SNAP is currently the primary source of nutrition assistance for low-income Americans enabling households to improve their diet by increasing their food purchasing power. As the nation's primary public program for ensuring food security and alleviating hunger, the SNAP needs to regularly monitor food security conditions among its target population. This monitoring need requires that USDA continue basic data collection, analysis, and evaluation.

Need and Use of the Information: The data collected by the food security supplement will be used to monitor the prevalence of food security, food insecurity, and very low food security within the U.S. population as a whole and in selected population subgroups; conducting research on causes of food insecurity and the role of Federal food and nutrition programs in ameliorating food insecurity; and continuing development and improvement of methods for measuring these conditions. Information will be collected on food spending, use of Federal and community food and nutrition assistance programs, difficulties in obtaining adequate food during the previous 12 months and 30 days due to constrained resources, and conditions that result from inadequate access to food.

Description of Respondents: Individuals or Households.

Number of Respondents: 53,935.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 6,927.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Manufacturers' Shipments, Inventories, and Orders (M3) survey collects monthly data on shipments, inventories, and new and unfilled orders from manufacturing companies. The orders, as well as the shipments and inventory data, are valuable tools for analysts of business cycle

conditions, including members of the Council of Economic Advisers, the Treasury Department, and the business community.

The monthly M3 Survey estimates are based on a relatively small sample and reflect primarily the month-to-month changes of large companies. There is a clear need for periodic benchmarking of the M3 estimates to reflect the manufacturing universe. The Annual Survey of Manufactures (ASM) provides annual benchmarks for the shipments and inventory data in this monthly survey. There is no benchmark for unfilled orders. The U.S. Census Bureau plans a reinstatement to an expired collection "Manufacturers' Shipments, Inventories and Orders (M3) Supplement: 2006–2007 Unfilled Orders Benchmark Survey," to be renamed the "Manufacturers' Unfilled Orders Survey." Over the life of the M3 Survey, there have been four surveys specifically designed to collect unfilled orders. These surveys were conducted in 1976, 1986, 2000, and 2008. After analyzing the results of the 2008 survey, the Census Bureau ascertained the need for an ongoing data collection of unfilled orders data annually.

The Manufacturers' Unfilled Orders Survey will be used as a benchmark for the M3 Survey each year. The Census Bureau will use these data to develop universe estimates of unfilled orders as of the end of the calendar year and adjust the monthly M3 data on unfilled orders to these levels on the NAICS basis. The benchmarked unfilled orders levels will be used to derive estimates of new orders received by manufacturers. The survey data will also be used to determine whether it is necessary to collect unfilled orders data for specific industries on a monthly basis; some industries are not requested to provide unfilled orders data on the M3 Survey.

II. Method of Collection

The Census Bureau will use mail out/mail back survey forms to collect the data. Companies will be asked to respond to the survey within 30 days of receipt. Letters encouraging participation will be mailed to companies that have not responded by the designated time. Telephone follow-up will be conducted to obtain response from delinquent companies.
