This instant notice identifies the FERC staff's planned schedule for the completion of the EA for the Project.

Schedule for Environmental Review

90-day Federal Authorization Decision
Deadline—June 1, 2017

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

The Project purpose is to provide 133,333 dekatherms per day to serve Entergy Louisiana, LLC's proposed natural gas-fired power plant facility located near Montz, Louisiana. Gulf South proposes to construct a new 5,000 horsepower compressor station near Montz, Louisiana (Montz Compressor Station), about 900 feet of new 16-inch-diameter pipeline, and auxiliary facilities.

The proposed Montz Compressor Station would be on the border of St. Charles and St. John the Baptist Parishes. Gulf South plans to begin construction of the Project in the fall of 2017 and place the facilities in-service by September 1, 2018.

Background

On August 24, 2016, the Commission issued a *Notice of Intent to Prepare an Environmental Assessment for the Proposed St. Charles Parish Expansion Project and Request for Comments on Environmental Issues* (NOI). The NOI was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the NOI, the Commission received comments from the U.S. Environmental Protection Agency and the Choctaw Nation of Oklahoma. The primary issues raised by the commentors are air quality, impacts on wetlands, tribal coordination, the availability of cultural surveys, and environmental justice impacts.

RIN 2060–AS26

Granting Petitions To Add n-Propyl Bromide to the List of Hazardous Air Pollutants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; request for public comment.

SUMMARY: The Environmental Protection Agency (EPA) is publishing a draft notice of the rationale for granting petitions to add n-propyl bromide (nPB), also known as 1-bromopropane (1-BP), (Chemical Abstract Service No. 106–94–5) to the list of hazardous air pollutants (HAP) contained in section 112(b)(1) of the Clean Air Act (CAA). The Halogenated Solvents Industry Alliance (HSIA) and New York State Department of Environmental Conservation (NYSDEC) submitted petitions requesting that nPB be added to the list of HAP. In response to the EPA requests for additional data, HSIA subsequently supplemented its petition. Petitions to add a substance to the list of HAP are permitted under the CAA section 112(b)(3).

Based on the EPA’s evaluation of the petitioners’ showing concerning potential hazards, emissions, and atmospheric dispersion modeling that provided estimates of ambient concentrations of nPB, the EPA has determined that there is adequate evidence to support a determination that emissions and ambient concentrations of nPB may reasonably be anticipated to cause adverse health effects.

DATES: Comments must be received on or before March 10, 2017.
