SUPPLEMENTARY INFORMATION: The Digital Television Transition and Public Safety Act of 2005 directed NTIA, in consultation with the Department of Homeland Security (DHS), to establish and administer a grant program to assist public safety agencies in the advancement of interoperable communications.¹ The Act authorized NTIA to make payments not to exceed \$1 billion, in the aggregate, through fiscal year 2010 to carry out the PSIC program. The grant program assisted public safety agencies in the acquisition of, deployment of, or training for the use of interoperable communications systems that can utilize reallocated public safety spectrum in the 700 MHz band for radio communication.²

On September 30, 2007, the Public Safety Interoperable Communications (PSIC) Grant Program awarded \$968,385,000 to fund interoperable communications projects from the 56 States and Territories.³ These awards represent the largest single infusion of Federal funding ever provided for State, Territory, and local agencies to implement communications solutions.

NTIA prepared the final PEA and draft FONSI in accordance with the requirements of the National Environmental Policy Act of 1969 (NEPA) and the Council on Environmental Quality (CEQ) regulations for implementing NEPA.⁴
