

Operating License No. DPR-46 for the Cooper Nuclear Station, located in Nemaha County, Nebraska.

The proposed amendment would have revised the Technical Specifications to correct the method by which the Standby Gas Treatment System heaters are tested.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on July 14, 1999 (64 FR 38030). However, by letter dated September 29, 2000, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated June 8, 1999, and the licensee's letter dated September 29, 2000, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (<http://www.nrc.gov>).

Dated at Rockville, Maryland, this 26th day of October 2000.

[Docket No. 50-328]

Tennessee Valley Authority; Notice of Withdrawal of Application for Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Tennessee Valley Authority (TVA) to withdraw its June 7, 1999, application for proposed amendments to Facility Operating Licenses No. DPR-79 for the Sequoyah Nuclear Plant (SQN), Unit 2, located in Hamilton County, Tennessee. Notice of Consideration of Issuance of of this amendment was published in the **Federal Register** on July 28, 1999, (64 FR 40907).

The purpose of the licensee's amendment request was to revise the Technical Specifications (TS) to increase the maximum allowed specific activity of the primary (reactor) coolant

from 0.35 microcuries/gram dose equivalent Iodine-131 (I-131) to 1.0 microcuries/gram dose equivalent I-131 for the Unit 2 Cycle 10 core. The change for Unit 2 back to 1.0 microcuries/gram (the previous TS limit) was to have been a provisional allowance to provide operational flexibility with respect to the reactor coolant specific activity because an unexpected increase in the specific activity associated with I-131 occurred during startup following the previous refueling outage due presumably to minor fuel clad leakage.

By letter dated October 17, 2000, TVA withdrew the proposed change on the basis that reactor coolant dose equivalent I-131 activity had not closely approached the current TS limit and was not expected to before the refueling outage that commenced on October 22, 2000.

For further details with respect to this action, see the application for amendments dated August 30, 1999, and TVA's letter dated October 17, 2000, which withdrew the application for the license amendment.

These Documents may be examined, and/or copied for a fee, at the Commission's Public Document room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (<http://www.nrc.gov>).

[Docket Nos. 50-327 and 50-328]

Tennessee Valley Authority; Notice of Withdrawal of Application for Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Tennessee Valley Authority (TVA) to withdraw its August 30, 1999, application for proposed amendments to Facility Operating Licenses Nos. DPR-77 and DPR-79 for the Sequoyah Nuclear Plant, Units 1 and 2, located in Hamilton County,

Tennessee. Notice of Consideration of Issuance of this amendment was published in the **Federal Register** on October 6, 1999 (64 FR 54382).

The proposed amendments would have revised the facility technical specifications (TS) by adding a Section 3.0.7 to address the use of interim provisions upon the discovery of an unintended TS action.

Subsequently, by letter dated October 17, 2000, TVA withdrew the proposed amendment application on the basis that approval of the amendment was unlikely because of legal concerns on the part of the Commission.

For further details with respect to this action, see the application for amendments dated August 30, 1999, and the TVA's letter dated October 17, 2000, which withdrew the application for license amendments.

whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Title and Purpose of Information Collection

Self-Employment and Substantial Service Questionnaire; OMB 3220-0138

Section 2 of the Railroad Retirement Act (RRA) provides for payment of annuities to qualified employees and their spouses. In order to receive an age and service annuity, Section 2(e)(3) states that an applicant must stop all railroad work and give up any rights to return to such work. A disability applicant must give up all railroad work, but does not have to relinquish rights to return to railroad work until he or she attains full retirement age, or, if earlier, a spouse annuity or supplemental annuity becomes payable. Under the 1988 amendments to the RRA, an applicant is no longer required to stop work for a "Last Pre-Retirement Nonrailroad Employer" (LPE). LPE is the last person, company or institution with whom an employee or spouse applicant was employed concurrently with, or after, the applicant's last railroad employment and before their annuity beginning date. However, section 2(f)(6) of the RRA requires that a portion of the employee's Tier II benefit and supplemental annuity be deducted for earnings from a "LPE" employer.

The RRB utilizes Form AA-4, Self-Employment and Substantial Service Questionnaire to obtain information needed to determine if the applicant's work is LPE, railroad service or self-employment. If the work is self-employment, the questionnaire identifies any months in which the applicant did not perform substantial service. One response is requested of each respondent. Completion is voluntary. However, failure to complete the forms could result in the nonpayment of benefits.

The RRB proposes minor nonburden impacting editorial and formatting changes to Form AA-4. The completion time for the AA-4 is estimated at between 40 and 70 minutes. The RRB estimates that approximately 1,500 AA-4's are completed annually.

FOR FURTHER INFORMATION CONTACT: To request more information or to obtain a
