SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau conducts the annual Company Organization Survey (COS) to update and maintain a central, multipurpose Business Register (BR) database. In particular, the COS supplies critical information on the composition, organizational structure, and operating characteristics of multi-location companies.

The BR serves two fundamental purposes:

First and most important, it provides sampling populations and enumeration lists for the Census Bureau's economic surveys and censuses, and it serves as an integral part of the statistical foundation underlying those programs. Essential for this purpose is the BR's ability to identify all known United States business establishments and their parent companies. Further, the BR must accurately record basic business attributes needed to control sampling and enumeration. These attributes include industrial and geographic classifications, and name and address information.

Second, it provides establishment data that serve as the basis for the annual County Business Patterns (CBP) statistical series. The CBP publications present data on number of establishments, first quarter payroll, annual payroll, and mid-March employment summarized by industry and employment size class for the United States, the District of Columbia, island areas, counties, and country-

equivalents. No other annual or more frequent series of industry statistics provides comparable detail, particularly for small geographic areas.

II. Method of Collection

The Census Bureau will conduct the 2013 COS in a similar manner as the 2011 COS. (In 2012 the COS was conducted in conjunction with the 2012 Economic Census to minimize response burden). The 2013 COS will request company-level information from a selection of multi-establishment enterprises, which comprise roughly 42,000 parent companies and more than 1.4 million establishments. Additionally, the panel will include approximately 5,000 large single-location companies that may have added locations during the year. The primary collection medium for the COS is a paper questionnaire; however, many enterprises will submit automated/electronic COS reports. Electronic reporting will be available to all 2013 COS respondents. Companies will receive and return responses by secure Internet transmission. Companies that cannot use the Internet will receive a CD-ROM containing their electronic data. All respondents will be allowed to mail the data via diskette or CD-ROM or submit their responses via the Internet. COS content is identical for all of the reporting modes.

The instrument will include inquiries on ownership or control by domestic or foreign parent, ownership of foreign affiliates, and leased employment. Further, the instrument will list an inventory of establishments belonging to the company and its subsidiaries, and request updates to these inventories, including additions, deletions, and changes to information on EIN, name and address, and industrial classification, end-of-year operating status, mid-March employment, first quarter payroll, and annual payroll.

Additionally, the Census Bureau will ask certain questions in the 2013 COS in order to enhance content. We will include questions on ownership or control by domestic or foreign parents, ownership of foreign affiliates, research and development, leased employment, and manufacturing activities related to the Enterprise Statistics Program.
