

States with harvest programs for wild and/or cultivated American ginseng include: Alabama, Arkansas, Georgia, Idaho, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Michigan, Minnesota, Missouri, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Tennessee, Vermont, Virginia, Washington, West Virginia, and Wisconsin.

During the week of February 17, 2003, the Divisions of Scientific Authority and Management Authority hosted an American ginseng workshop in St. Louis, Missouri, with representatives of State and Federal agencies that regulate the plant to discuss the status and management of American ginseng and the CITES export program for the species. The workshop provided an important opportunity for representatives of the States and Federal agencies to work cooperatively to develop recommendations to improve the management and the CITES export program of this plant. In anticipation of this year's and future findings, we are now seeking public input on the wild status, production, and export of American ginseng. In particular, we are most interested in any new information on wild ginseng, and the production and export of wild-simulated and woods-grown American ginseng.
