SUPPLEMENTARY INFORMATION:

Summary of Information Collection

The SDDC provides global surface deployment command and control and distribution operations to meet National Security objectives in peace and war. To carry out its mission, SDDC works with industry partners in several program areas: Freight Domestic Distribution Program; Freight Global Distribution Program; Passenger Traffic Management Program; Personal Property Traffic Management Program. Most industry partners only provide services in one or two of the program areas, so the survey design provides for transparently skipping respondents only to the sections that are relevant to them. These voluntary partnership surveys will continue to be a collaborative effort to obtain feedback for improving the SDDC business processes.
