## NATIONAL SCIENCE FOUNDATION

### Notice of Availability of a Draft Site-Specific Environmental Assessment and Notice of Public Hearings

**AGENCY:** National Science Foundation.

**ACTION:** Notice of the availability of a Draft Site-Specific Environmental Assessment (Draft SSEA) for the Ocean Observatories Initiative (OOI), request for public comment on the Draft SSEA, and notice of public hearings.

**SUMMARY:** The National Science Foundation (NSF) gives notice of the availability of the Draft SSEA for the OOI, and requests public review and comment on the document. NSF also provides notice of public hearings on the Draft SSEA for the OOI. The Division of Ocean Sciences in the Directorate for Geosciences (GEO/OCE) has prepared a Draft SSEA for the OOI, a multi-million dollar Major Research Equipment and Facilities Construction effort intended to put moored and cable infrastructure in discrete locations in the coastal and global ocean. The Draft SSEA has been prepared to assess the potential impacts on the human and

natural environment associated with proposed site-specific requirements in the design, installation, and operation of the OOI that were previously assessed in a 2008 Programmatic Environmental Assessment (PEA) and a 2009 Supplemental Environmental Report (SER). The scope of the environmental impact analysis of the SSEA is tiered from the previously prepared PEA, associated Finding of No Significant Impact (FONSI), and SER. It focuses only on those activities and the associated potential impacts, including cumulative impacts, resulting from the site-specific installation and operation of OOI assets and not previously assessed in the PEA and SER. The Draft SSEA is available for public comment for a 30-day period. Comments may be mailed to Jean McGovern, National Science Foundation, Division of Ocean Sciences, 4201 Wilson Blvd., Arlington, VA 22230, or submitted via e-mail at [nepacommments@nsf.gov](mailto:nepacommments@nsf.gov). The deadline for submitting comments is September 15, 2010.

NSF will conduct three public hearings to receive oral and written comments on the Draft SSEA. Federal, state, and local agencies, Native American Tribes and Nations, and interested individuals are invited to be present or represented at the public hearings. This notice announces the dates and locations of the public hearings for this Draft SSEA. An open house session will precede the scheduled public hearing at each of the locations listed below and will allow individuals to review the information presented in the Draft SSEA. NSF representatives will be available during the open house sessions to clarify information related to the Draft SSEA.

*Dates and Addresses:* All hearings will start with an open house session from X p.m. to X p.m. A presentation and formal public comment period will be held from X p.m. to X p.m. Public hearings will be held on the following dates and at the following locations:

- Wednesday, September 1, 2010, at Westport Maritime Museum, Westport, WA.
- Thursday, September 2, 2010, at Guin Library Seminar Room, Hatfield Marine Science Center, Newport, OR.
- Wednesday, September 8, 2010, at New Bedford Library, 613 Pleasant Street, New Bedford, MA 02740-6203.

**FOR FURTHER INFORMATION CONTACT:**

Copies of the Draft SSEA are available upon request from: Jean McGovern, NSF, Division of Ocean Sciences, 4201 Wilson Blvd., Arlington, VA 22230; Telephone: (703) 292-7591. The Draft SSEA is also available at the following

**SUPPLEMENTARY INFORMATION:**

Oceanographic research has long relied on research vessel cruises (expeditions) as the predominate means to make direct measurements of the ocean. Remote sensing (use of satellites) has greatly advanced abilities to measure ocean surface characteristics over extended periods of time. A major advancement for oceanographic research methods is the ability to make sustained, long-term, and adaptive measurements from the surface to the ocean bottom. "Ocean Observatories" are now being developed to further this goal. Building upon recent technology advances and lessons learned from prototype ocean observatories, NSF's Ocean Sciences Division (OCE) is proposing to fund the OOI, an interactive, globally distributed and integrated infrastructure that will be the backbone for the next generation of ocean sensors and resulting complex ocean studies presently unachievable. The OOI reflects a community-wide, national and international scientific planning effort and is a key NSF contribution to the broader effort to establish focused national ocean observatory capabilities through the Integrated Ocean Observing System (IOOS).

The OOI infrastructure would include cables, buoys, deployment platforms, moorings, junction boxes, electric power generation (solar, wind, and/or fuel cell.), and two-way communications systems. This large-scale infrastructure would support sensors located at the sea surface, in the water column, and at or beneath the seafloor. The OOI would also support related elements, such as unified project management, data dissemination and archiving, modeling of oceanographic processes, and education and outreach activities essential to the long-term success of ocean science. It would include the first U.S. multi-node cabled observatory; fixed and re-locatable coastal arrays coupled with mobile assets; and advanced buoys for interdisciplinary measurements, especially for data limited areas of the Southern Ocean and other high-latitude locations.

The OOI design is based upon three main technical elements across global, regional, and coastal scales. At the global and coastal scales, moorings would provide locally generated power to seafloor and platform instruments and sensors and use a satellite link to shore and the Internet. Up to four Global Scale Nodes (GSN) or buoy sites are proposed for ocean sensing in the
