FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Eric Orbesen, (305) 361-4253 or Eric.Orbesen@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

The Cooperative Game Fish Tagging Program was initiated in 1971 as part of a comprehensive research program resulting from passage of Public Law 86-359, Study of Migratory Game Fish, and other legislative acts under which the National Marine Fisheries Service (NMFS) operates. The Cooperative Tagging Center attempts to determine the migration patterns of, and other biological information for, billfish, tunas, and swordfish. The fish tagging report is provided to the angler with the tags, and he/she fills out the card with the information when a fish is tagged and mails it to NMFS. Information on each species is used by NMFS to determine migratory patterns, distance traveled, stock boundaries, age, and growth. These data are necessary input for developing management criteria by regional fishery management councils, states, and NMFS.

II. Method of Collection

Information is submitted by mail.

III. Data

OMB Control Number: 0648-0247.

Form Number: NOAA form 88-162.

Type of Review: Regular submission (extension of a current information collection).

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved collection. U.S. fishermen, participating in the Pacific albacore tuna fishery, are required to obtain a Highly Migratory Species Fishery Management Plan and/or a High-Seas Fishery Compliance Act permit. A requirement for the permits is to complete and submit logbooks documenting their daily fishing activities, including catch and effort for each fishing trip. Submissions must be made within 30 days of the completion of a trip. The information obtained is used by the agency to assess the status of Pacific albacore stocks and to monitor the fishery.
