**SUPPLEMENTARY INFORMATION:** The FEIS/  
GMP analyzes two alternatives for  
managing Great Falls Park, Virginia. The  
plan is intended to provide a foundation  
to help park managers guide park  
programs and set priorities for the

management of Great Falls Park,  
Virginia, for the next 20 years. The  
FEIS/GMP evaluates the environmental  
consequences of the preferred  
alternative and the status quo  
alternative on natural and cultural  
resources, recreational opportunities,  
traditional park character and visitor  
experience, and public health and  
safety.

Alternative A, “Status Quo/  
Continuation of Current Conditions,”  
maintains the status quo in the park,  
and describes resource conditions  
where existing practices continue to  
guide park practices. This alternative  
does not address resource protection  
planning needs including a Climbing  
Management Plan and a Trail  
Management Plan.

Alternative B (Preferred Alternative  
[Modified]) is based on an overall goal  
for the park of balancing opportunities  
for recreation while protecting sensitive  
natural and cultural resources. The  
preferred alternative described in the  
DEIS/GMP has been modified based on  
public and agency Comments that were  
received, as well as additional review by  
the internal planning team.

All interested individuals, agencies,  
and organizations are urged to provide  
comments on the FEIS/GMP. The NPS,  
in making a final decision regarding this  
matter, will consider all comments  
received by the closing date.

Our practice is to make comments,  
including names and home addresses of  
respondents, available for public review  
during regular business hours. Before  
including your address, phone number,  
e-mail address, or other personal  
identifying information in your  
comment, be advised that your entire  
comment—including your personal  
identifying information—may be made
