The patent rights in these inventions have been assigned and/or exclusively licensed to the government of the United States of America.

The prospective exclusive license territory may be worldwide, and the fields of use may be limited to the following:

Treatment of B cell malignancies using autologously-derived, lentiviral vector transduced, T cells expressing chimeric antigen receptor(s) (CAR) dual specific for CD19 and CD22, utilizing the anti-CD19 antigen binding domain of the FM63 antibody and the anti-CD22 antigen binding domain of the M971 antibody

This technology discloses CAR therapies that target both CD19 and

CD22 by utilizing the anti-CD19 binder known as FM63 and the anti-CD22 binder known as M971. CD19 and CD22 are each expressed on the surface of B cells in B cell malignancies and are hallmark examples of antigen targeting in CAR-T therapies, with CD19-targeting CAR-T therapies being the first FDA approved CAR-T, and CD22-targeting CAR-T showing early promise in clinical trials for ALL and NHL.

This Notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published Notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information from these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

A. Overview of Information Collection

Title of Information Collection: Survey of Market Absorption of New Multifamily Units (SOMA).

OMB Approval Number: 2528-0013.

Type of Request: Revision.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
SOMA	12,000.00	4.00	48,000.00	*.125	6,000.00	\$36.75	\$220,500.00

Description of the need for the information and proposed use: The Survey of Market Absorption (SOMA) provides the data necessary to measure the rate at which new rental apartments and new condominium apartments are absorbed; that is, taken off the market, usually by being rented or sold, over the course of the first twelve months following completion of a building. The data are collected at quarterly intervals until the twelve months conclude, or until the units in a building are completely absorbed. The survey also provides estimates of certain characteristics, including asking rent/price, number of units, and number of bedrooms. The survey provides a basis for analyzing the degree to which new apartment construction is meeting the present and future needs of the public.
