

4. *Who is required or asked to report:* Holders of operating licenses for commercial nuclear power plants.

5. *The number of annual respondents:* 104.

6. *The number of hours needed annually to complete the requirement or request:* 56,471.

7. *Abstract:* With NRC Forms 366, 366A, and 366B, the NRC collects reports of the types of reactor events and problems that are believed to be significant and useful to the NRC in its effort to identify and resolve threats to public safety. They are designed to provide the information necessary for engineering studies of operational anomalies and trends and patterns analysis of operational occurrences. The same information can be used for other analytic procedures that will aid in identifying accident precursors.

Submit, by April 9, 2001 comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1F23, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide web site (<http://www.nrc.gov/NRC/PUBLIC/OMB/index.html>). The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions about the information collection requirements may be directed to the NRC Clearance Officer, Brenda Jo. Shelton, U.S. Nuclear Regulatory Commission, T-6 E6, Washington, DC 20555-0001, by telephone at 301-415-7233, or by Internet electronic mail at [BJS1@NRC.GOV](mailto:BJS1@NRC.GOV).

Dated at Rockville, Maryland, this 31st day of January 2001.

For the Nuclear Regulatory Commission.

**Brenda Jo. Shelton,**  
NRC Clearance Officer, Office of the Chief Information Officer.

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-400]

### Carolina Power & Light Company; Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License (OL) No. NPF-63, issued to Carolina Power & Light Company (CP&L, the licensee), for operation of the Shearon Harris Nuclear Power Plant, Unit 1 (HNP), located in Wake and Chatham Counties, North Carolina.

The proposed amendment would change the OL and Technical Specifications for HNP to reflect an increase in the licensed core power level to 2900 megawatts (thermal), 4.5% greater than the current level.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By March 8, 2001, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714, which is available at the Commission's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (<http://www.nrc.gov>). If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of

the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to

present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to Mr. William D. Johnson, Vice President and Corporate Secretary, Carolina Power & Light Company, Post Office Box 1551, Raleigh, North Carolina 27602, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated December 14, 2000, which is available for public inspection at the Commission's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (<http://www.nrc.gov>).

Dated at Rockville, Maryland, this 31st day of January 2001.

For the Nuclear Regulatory Commission.

**Richard J. Laufer,**

*Project Manager, Section 2, Project Directorate II, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.*

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-213-OLA and ASLBP No. 01-787-02-OLA]

### Connecticut Yankee Atomic Power Company Haddam Neck Plant; Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 Fed. Reg. 28,710 (1972), and Sections 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717, 2.721, and 2.772(j) of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established to preside over the following proceeding:

Connecticut Yankee Atomic Power Company Haddam Neck Plant

This Board is being established pursuant to a notice of consideration of issuance of operating license amendments, proposed no significant hazards consideration determination, and opportunity for a hearing published in the **Federal Register** (65 Fed. Reg. 77,913, 77,915 (Dec. 13, 2000)). The proceeding involves petitions for intervention filed on January 10 and January 12, 2001, respectively, by Citizens Awareness Network and the Connecticut Department of Public Utility Controls challenging a license amendment request by Connecticut Yankee Atomic Power Company to add a license condition to the operating license for the Haddam Neck Plant. The amendment would approve the License Termination Plan (LTP), dated July 7, 2000, and allow the licensee to make changes to the approved LTP without prior Nuclear Regulatory Commission approval, provided criteria specified in the license condition are met.

The Board is comprised of the following administrative judges:

Ann Marshall Young, Chair, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001

Dr. Peter S. Lam, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001

Thomas D. Murphy, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001

All correspondence, documents, and other materials shall be filed with the administrative judges in accordance with 10 CFR 2.701.

Issued at Rockville, Maryland, this 31st day of January 2001.

**G. Paul Bollwerk, III,**

*Chief Administrative Judge, Atomic Safety and Licensing Board Panel.*

## NUCLEAR REGULATORY COMMISSION

### Public Workshop to Discuss Nuclear Power Reactor Steam Generator Tube Issues

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of Workshop.

**SUMMARY:** The Nuclear Regulatory Commission (NRC) will host a public workshop to provide an opportunity for discussion of recent events with respect to nuclear power plant steam generators and their implications. The workshop is open to the public.

**DATES:** The workshop will be held on Tuesday, February 27, 2001, from 7:30 a.m. to 5:15 p.m. and Wednesday, February 28, 2001 from 8:00 a.m. to 11:45 a.m.

**ADDRESSES:** Holiday Inn, Bethesda, 8120 Wisconsin Avenue, Bethesda, Maryland 20814. The hotel's telephone number is (301) 652-2000.

#### FOR FURTHER INFORMATION CONTACT:

Robert L. Rothman, Mail Stop O-9D3, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone: (301) 415-3306, email [rlr@nrc.gov](mailto:rlr@nrc.gov).

**SUPPLEMENTARY INFORMATION:** All pressurized water reactor licensees are required by NRC regulations to provide reasonable assurance of steam generator tube integrity. These regulations pertain to design, operation and surveillance activities of steam generators and are reflected in the licensing basis of each facility. The surveillance requirements are important to maintaining integrity, since different types of tube degradation are expected to occur over the life of the steam generator. Tubes that are identified as containing defects of a specified depth are removed from service.

In recent years, the NRC staff has examined the regulatory programs which comprise the framework for ensuring the integrity of steam generator tubes. In 1997 the Nuclear Energy Institute proposed NEI 97-06, "Steam Generator Program Guidelines," as a formal industry initiative to provide a consistent industry approach for managing steam generator programs and for maintaining steam generator tube integrity. In 1998, the Commission
