Abstract: The information collection activities covered by this ICR renewal are those carried out by a chemical manufacturer in requesting a specific chemical risk evaluation under the Toxic Substance Control Act (TSCA) be conducted by EPA. EPA established the process for conducting risk evaluations under TSCA. Chemicals that will undergo this evaluation include chemicals the Agency has prioritized, as well as chemicals for which EPA has granted requests made by manufacturers to have the chemicals evaluated under EPA's risk evaluation process. EPA has established criteria and information chemical manufacturers must provide for EPA to consider a chemical substance for risk evaluation. This information is necessary in order for EPA to review information covered by chemical manufacturers and determine if the chemical substance is suitable for risk evaluation.

Form Numbers: None.

Respondents/affected entities:

Persons that manufacture chemical substances and request a chemical be considered for risk evaluation by EPA.

Respondent's obligation to respond: Voluntary (15 U.S.C. 2605(b)(4)).

Estimated number of respondents: 5.

Frequency of response: On occasion.

Total estimated burden: 419 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$283,570 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is no change in hour or cost burden as compared with what is currently approved by OMB. There is an increase of \$709 in the total estimated labor

costs, which reflects the increase in wage rates since the initial ICR.

Director, Regulatory Support Division.
