

would be generally small-diameter trees. No commercial recovery of any by-products of these treatments is proposed in the IRA's. One replacement of a ford with a culvert would also occur in the Call Mountain IRA.

- Treat two units, one Aspen and one High-Elevation Mixed Conifer, totaling 46.8 acres in the Torrey Mountain Recommended Wilderness. The Aspen would be treated with lop and scatter and the High-Elevation Mixed Conifer would be treated with daylighting of the Whitebark Pine with chainsaws only.

Possible Alternatives

1—*No Action Alternative*. Under this alternative there would be no treatment of the vegetation communities. Roads would not be reconditioned or reconstructed, and no culverts or fords would be replaced. Many of the proposed units will continue to have encroachment from conifers, decreased age class diversity, poor vigor, and higher susceptibility to insect and disease such as mountain pine beetle and blister rust.

Responsible Official

The Dillon District Ranger will be the responsible official.

Nature of Decision To Be Made

The decision to be made is whether to implement the proposed action, another alternative, or a combination of the alternatives.
