Center for Tobacco Products, Food and Drug Administration Funded Trainee/Scholar Survey

OMB Control Number 0910–NEW

The Tobacco Control Act (Pub. L. 111–31) amends the Federal Food, Drug, and Cosmetic Act (FD&C Act) to grant FDA authority to regulate the manufacture, marketing, and distribution of tobacco products to protect the public health and to reduce tobacco use by minors.

FDA's Center for Tobacco Products (CTP) and the National Institutes of Health maintain an interagency partnership to foster the development of the emerging field of tobacco regulatory science (TRS). This study will use the CTP, FDA Funded Trainee/Scholar Survey to gather data on the characteristics, activities, and impact of training programs funded by the CTP and other partners. This evaluation will also determine how CTP-funded research and associated training programs and activities increase knowledge and skills related to TRS and interest to pursue careers in a TRS-related field. This survey provides support to determine the extent to which programs and activities generate positive impacts to increase the number of researchers who focus on TRS and TRS-related topics, specifically within CTP's priority domains. The survey builds upon previous evaluations of trainees and training activities and provides necessary evidence to inform FDA decision making. The web survey will gather responses from Tobacco Centers of Regulatory Science (TCORS) trainees and other CTP-funded trainees and scholars. Results will provide insights and directions to support future training and funding investments.

FDA CTP will use findings from this study to determine whether its TRS training support investments lead to meaningful change that supports CTP aims, and to inform decisions about potential future investments. CTP's training support intends to build additional capacity for TRS that establishes an evidence base related to CTP's research priorities so that FDA regulations, communications, and application review are founded on rigorous, relevant scientific study.

Respondents include current and former TCORS or other CTP-funded trainees and trainee principal investigators (PIs) or training directors. PIs and training directors will be asked to provide trainee names and email addresses and encourage trainees to participate in the survey. Current and former trainees will be asked to read an informed consent and take a brief web-based survey.

In the **Federal Register** of September 12, 2019 (84 FR 48148), FDA published a 60-day notice requesting public comment on the proposed collection of information. No comments were received.
