

• Note that additional grant programs may be added pending Fiscal Year 2022 and future Fiscal Year appropriations.

Additionally, all RCORP grant award recipients are supported by eight cooperative agreements: RCORP-Technical Assistance, which provides extensive technical assistance to award recipients; RCORP-Evaluation, which evaluates the impact of the RCORP initiative on rural communities; three RCORP-Behavioral Health Care Workforce Centers, which provide workforce training and education initiatives in the region served by the Northern Border Regional Commission; and three RCORP-Centers of Excellence, which disseminate best practices related to the treatment for and prevention of substance use disorders within rural communities.

A 60-day notice published in the **Federal Register**, 86 FR 69655 (December 8, 2021). There were no public comments.

Need and Proposed Use of the Information: Due to the growth in the number of grant programs included in the RCORP initiative, as well as emerging SUD and other behavioral health trends in rural communities, HRSA is submitting a revised package that includes changes to existing RCORP performance measures as well as new performance measures that better

demonstrate the impact of the initiative on rural communities and reduce burden on the grant recipients.

For this program, performance measures were developed to provide data on each RCORP initiative and to enable HRSA to provide aggregate program data required by Congress under the Government Performance and Results Act of 1993. These measures cover the principal topic areas of interest to the Federal Office of Rural Health Policy, including: (a) Provision of, and referral to, rural behavioral health care services, including SUD prevention, treatment and recovery support services; (b) behavioral health care, including SUD prevention, treatment, and recovery, process and outcomes; (c) education of health care providers and community members; (d) emerging trends in rural behavioral health care needs and areas of concern; and (e) consortium strength and sustainability. All measures will speak to the Federal Office of Rural Health Policy's progress toward meeting the goals set.

Likely Respondents: The respondents will be the grant award recipients of the RCORP initiatives.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information

requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

The below burden estimate is significantly lower than the original package submitted in 2019 (2,750 total burden hours). This is likely due to the fact that (1) many of the grant recipients HRSA consulted to obtain the burden estimate for this ICR revision have been collecting and reporting RCORP performance measures since March 2020 and have a better understanding of the burden required; (2) HRSA eliminated and/or streamlined some of the more burdensome prevalence and workforce measures; and (3) grant recipients of the RCORP-Psychostimulant program will only report on an annual (vs. biannual) basis.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent (annually)	Total responses	Average burden per response (in hours)	Total burden hours
Rural Communities Opioid Response Program-Implementation/Neonatal Abstinence Syndrome/MAT Expansion ..	290	2	580	1.24	719.20
Rural Communities Opioid Response Program-Psychostimulant Support	15	1	15	1.30	19.50
Total	305	595	738.70

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
