Background and Purpose

Dynamic Positioning Systems (DPSs), Emergency Disconnect Systems (EDSs), Blowout Preventers (BOPs) and related training and emergency procedures are critical to the safety of a MODU actively engaged in drilling. Operators, technicians, and inspectors should view these integrated systems holistically, but the myriad requirements imposed by multiple oversight entities makes this exceedingly difficult. For example, these systems are subject to international guidelines, Coast Guard and Bureau of Safety and Environmental Enforcement (BSEE) regulations, industry standards and Flag State requirements. The draft policy letter (available in the docket for this notice) would give guidance on how to witness inspection and tests of these critical systems by industry and BSEE in a holistic way using the various requirements, standards and guidelines. It would encourage Coast Guard Officer-in-charge of Marine Inspections ("OCMI"), at the invitation of BSEE, operator or MODU contractor, to witness drills and equipment tests of these systems during a joint visit with BSEE when a MODU is not drilling, typically when the MODU arrives at a new well location. The policy letter would encourage OCMI to establish early communication with the operator, MODU contractor, and BSEE in order to prevent any delay in oil exploration. This policy letter represents a preliminary effort to better understand how industry conducts these tests, enhance communication and coordination with BSEE, inform future rulemaking, and investigate how oversight of these critical systems and training could be incorporated into future inspection policy.

The guidance contained in the draft policy letter is not a substitute for applicable legal requirements, nor is it itself a rule. If finalized, it would provide operational guidance for Coast Guard personnel. It is not the Coast Guard's intent to impose legally binding requirements on any party outside the Coast Guard through this policy letter. The policy letter would represent the Coast Guard's current thinking on this topic and could assist industry, mariners, the general public, and the Coast Guard, as well as other Federal and state regulators, in applying statutory and regulatory requirements.
