The document was prepared by the Ecological Risk Assessment Support Center managed by the National Center for Environmental Assessment within EPA’s Office of Research and Development.

EPA is releasing this draft document solely for the purpose of pre-dissemination peer review under applicable information quality guidelines. This document has not been formally disseminated by EPA. It does not represent and should not be construed to represent any Agency policy or determination. EPA will consider any public comments submitted in accordance with this notice when revising the document.

April 2, 2007. Technical comments should be in writing and must be received by EPA by April 2, 2007.

ADDRESSES: The draft document, “Evaluating Ecological Risk to Invertebrate Receptors from PAHs in Sediments at Hazardous Waste Sites,” is available primarily via the Internet on the National Center for Environmental Assessment’s home page under the “Recent Additions” and “Publications” menus at <http://www.epa.gov/ncea>. A limited number of paper copies are available from the Technical Information Staff, NCEA–Cin; telephone: 513–569–7257; facsimile: 513–569–7916. If you are requesting a paper copy, please provide your name, your mailing address, and the document title, “Evaluating Ecological Risk to Invertebrate Receptors from PAHs in Sediments at Hazardous Waste Sites.”

SUPPLEMENTARY INFORMATION:

I. Information About the Project/Document

U.S. EPA’s Ecological Risk Assessment Support Center (ERASC) is a knowledge center that provides technical information and addresses scientific questions on topics relevant to ecological risk assessment at hazardous waste sites for EPA’s Office of Solid Waste and Emergency Response (OSWER) and Regional Superfund/Resource Conservation and Recovery Act (RCRA) staff. Topics are submitted to ERASC by users in EPA program offices and regions. The ERASC is managed by the Office of Research and Development’s (ORD’s) National Center for Environmental Assessment and is located in Cincinnati, Ohio.

The ERASC recently completed an external review draft document titled, “Evaluating Ecological Risk to Invertebrate Receptors from PAHs in Sediments at Hazardous Waste Sites.” It provides an overview of an approach for assessing risk to invertebrate receptors

resulting from exposure to PAHs in contaminated sediments. The approach, based on procedures described in the EPA document, Procedures for the Derivation of Equilibrium Partitioning Sediment Benchmarks (ESBs) for the Protection of Benthic Organisms: PAH Mixtures (EPA/600/R–02/013), involves the use of equilibrium partitioning techniques to determine exposure/bioavailability and narcosis theory to estimate sublethal toxicity of PAHs. Examples of how to use this approach with analytical data resulting from the analysis of contaminated sediments are provided. The approach offers risk assessors a useful tool for assessing the risk of PAHs to benthic invertebrates at hazardous waste sites, particularly when used with other contaminated sediment assessment methods. The External Review Draft only addresses risks to benthic invertebrates because reaching a consensus scientific position on vertebrate risk issues is a longer-term prospect.
