

facility in Uinta County, Wyoming, and make the Project available for service, as authorized on November 6, 2020. Spire is authorized to complete the construction activities of the project under the Commission's blanket certificate prior notice procedure.

On August 30, 2019, Spire filed with the Commission in Docket No. CP19-505-000 a Prior Notice of Blanket Certificate Activity describing its plan to complete the Project.¹ The Project consists of converting two existing observation wells to vertical injection/withdrawal wells (Wells #15 and #34), and to construct related connecting flowlines and appurtenances that are necessary to improve the Belle Butte Storage Field's performance in Uinta County, Wyoming. Spire was required to complete construction of the Project facilities and make them available for service by November 6, 2020. Due to delays related primarily to the Covid-19 pandemic, the Bureau of Land Management's (BLM) Kemmerer Field Office in Kemmerer, Wyoming, was unable to provide Spire with the requisite land agreements to being construction on BLM-administered lands until October 9, 2020. Applicants now request an additional six-month extension of time, until May 6, 2021, to complete construction of the Project and place it into service.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on the Applicant's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10).²

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for Natural Gas Act facilities when such requests are contested before order issuance. For those extension requests that are contested,³ the Commission will aim to issue an order acting on the request

within 45 days.⁴ The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.⁵ The Commission will not consider arguments that re-litigate the issuance of the Certificate Order, including whether the Commission properly found the project to be in the public convenience or necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act.⁶ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.⁷ The OEP Director, or his or her designee, will act on all those extension requests that are uncontested.

[Docket No. CP21-2-000]

Southern Star Central Gas Pipeline, Inc.; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Lines DT and DS Replacement Project Amendment

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document, that will discuss the environmental impacts of the Lines DT and DS Replacement

Project Amendment (Amendment) involving abandonment of facilities by Southern Star Central Gas Pipeline, Inc. (Southern Star) in Anderson and Franklin Counties, Kansas. The Commission will use this environmental document in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result from its action whenever it considers the issuance of abandonment authorizations. This gathering of public input is referred to as "scoping." The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues. Additional information about the Commission's NEPA process is described below in the *NEPA Process and Environmental Document* section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on November 26, 2020. Comments may be submitted in written or oral form. Further details on how to submit comments are provided in the *Public Participation* section of this notice.

Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written or oral comments during the preparation of the environmental document.

If you submitted comments on this project to the Commission before the opening of this docket on October 2, 2020, you will need to file those comments in Docket No. CP21-2-000 to ensure they are considered as part of the proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this
