

Response system report; and 12 minutes for a Fishing Trip Record (Shellfish) report.

Needs and Uses: Fishing vessels permitted to participate in Federally-permitted fisheries in the Northeast are required to submit logbooks containing catch and effort information about their fishing trips. Participants in the herring and tilefish fisheries are also required to make weekly reports on their catch through an Interactive Voice Response (IVR) system. In addition, permitted vessels that catch halibut are asked to voluntarily provide additional information on the estimated size of the fish and the time of day caught. The information submitted is needed for the management of the fisheries. This action seeks to renew Paperwork Reduction Act clearance for these requirements.

Affected Public: Business or other for-profit, individuals or households.

Frequency: On occasion, monthly.

Respondent's Obligation: Mandatory.

OMB Desk Officer: David Rostker, (202) 395-3897.

Copies of the above information collection proposal can be obtained by calling or writing Madeleine Clayton,

Departmental Paperwork Clearance Officer, (202) 482-3129, Department of Commerce, Room 6086, 14th and Constitution Avenue, NW, Washington, DC 20230 (or via the Internet at MClayton@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503.

Dated: June 13, 2002.

Madeleine Clayton,

*Departmental Paperwork Clearance Officer,
Office of the Chief Information Officer.*

I-02/004178

The Honorable J. Dennis Hastert
Speaker of the House of
Representatives
Washington, D.C. 20515-6501

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act (AECA), as amended, we are forwarding herewith Transmittal No. 02-22 and under separate cover the classified offset certificate thereto. This Transmittal concerns the Department of the Navy's proposed Letter(s) of Offer and Acceptance (LOA) to Switzerland for defense articles and service estimated to cost \$104 million. Soon after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Reporting of Offset Agreements in accordance with Section 36(b)(1)(C) of the Arms Export Control Act (AECA), as amended, requires a description of any offset agreement with respect to this proposed sale. Section 36(g) of the AECA, as amended, provides that reported information related to offset agreements be treated as confidential information in accordance with section 12(c) of the Export Administration Act of 1979 (50 U.S.C. App. 2411(c)). Information about offsets for this proposed sale are described in the enclosed confidential attachment.

Sincerely,

A handwritten signature in cursive script, reading "Tome Walters, Jr.", is positioned above the typed name.

POLICY JUSTIFICATION**Switzerland – AIM-9X Sidewinder Missiles**

The Government of Switzerland has requested a possible sale of 222 AIM-9X Sidewinder Tactical Missiles, eight (8) NATM-9X Telemetry Missiles, 45 CATM-9X Captive Air Training Missiles, missile containers, missile modifications, test sets and support equipment, spare and repair parts, publications and technical data, maintenance, personnel training and training equipment, U.S. Government and contractor representatives, contractor engineering and technical support services, and other related elements of logistics support. The estimated cost is \$104 million.

The Government of Switzerland is a political and economic power in Europe and a partner of the United States in ensuring peace and stability in that region. It is vital to the U.S. national interest to assist the Swiss in developing and maintaining a strong and ready self-defense capability which will contribute to an acceptable military balance in the area.

The AIM-9X Sidewinder missile enhances self-defense capabilities bringing Swiss Air Force (SAF) F/A-18s up to capabilities found in neighboring country military forces. The incremental effect of the sale of AIM-9X on the overall capability of the SAF should not be particularly significant.

The Swiss Air Force has extensive experience operating the F/A-18 aircraft and should have no difficulties incorporating this upgraded weapon into their forces. The Swiss Air Force needs this upgrade to keep pace with high tech advances in weaponry.

The prime contractor will be Raytheon Systems Corporation of Tucson, Arizona. One or more proposed offset agreements may be related to this proposed sale.

Implementation of this proposed sale will require two contractor representatives on-site during the preparation, equipment installation, equipment installation, and testing/checkout.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 02-22

**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act**

**Annex
Item No. vii**

(vii) Sensitivity of Technology:

1. The AIM-9X represents a substantial increase in missile acquisition and kinematics performance over the AIM-9M. The missile includes a high off-bore-sight seeker, enhanced countermeasure rejection capability, low drag/high angle of attack airframe and the ability to integrate the Helmet Mounted Cueing System. The software algorithms are the most sensitive portion of the AIM-9X missile. The software continues to be modified during the testing phase in order to improve its counter-countermeasures capabilities. No software source code or algorithms will be released. Sensitive and/or classified (up to Secret) elements of the AIM-9X missiles include equipment/hardware, software, training, maintenance, documentation, and operation/performance.

2. The external view of the AIM-9X Sidewinder missile is unclassified and not sensitive. The AIM-9X features a high off-bore-sight seeker, enhanced countermeasure rejection capability, improved acquisition range and the ability to integrate with aircraft sensors. The seeker/guidance and control section and the target detector are confidential and contain sensitive state-of-the-art technology. Specifically, the infrared seeker sensitivity is a significant improvement over the previous AIM-9 variants. Manuals and technical documents for the AIM-9X that are necessary or support operational use and organizational maintenance have portions classified up to Secret. Performance and operating logic of the counter-countermeasures circuits are Secret. The hardware, software, and data identified are classified to protect vulnerabilities, design and performance parameters and similar critical information.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Switzerland can provide essentially the same degree of protection for the technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the policy justification portion of the notification.
