Abstract: Under Title II of the Clean Air Act (CAA) (42 U.S.C. 7521 *et seq.*), EPA issues certificates of conformity for motor vehicle designs and engines that comply with applicable emission standards set under section 202(a)(1) of the CAA, such as those for CO₂, N₂O, and CH₄ in the final regulation. Under 49 U.S.C. 32902, NHTSA is mandated to require manufacturers comply with fuel economy and consumption standards. Manufacturers will submit applications to certify their products and respond to the information collection activities detailed in the HD National Program. They will also submit reports, conduct compliance testing, label certified vehicles, provide final year-end reports and retain records of information.

Manufacturer test results will be used by EPA to perform confirmatory testing on a sufficient number of engines and vehicles to confirm manufacturer-reported results. EPA’s emission certification programs and NHTSA’s fuel efficiency programs are statutorily mandated. EPA does not have discretion to cease these functions under Section 206(a) of the CAA (42 U.S.C. 7521).

Abstract: The New Source Performance Standards (NSPS) for Metal Coil Surface Coating (40 CFR part 60, subpart TT) were: Proposed on January 5, 1981; promulgated on November 1, 1982; and amended on June 24, 1986 and October 17, 2000. These regulations apply to the following surface coating lines in the metal coil surface coating industry: Each prime coat operation; each finish coat operation; and each prime and finish coat operation cured simultaneously, where the finish coat is applied wet-on-wet over the prime coat. This information is being collected to assure compliance with 40 CFR part 60, subpart TT.

In general, all NSPS standards require initial notification reports, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Any owner/operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the U.S. Environmental Protection Agency (EPA) regional office.
